GDSN Bulletin
The GDSN continues to grow

GS1 GDSN (Global Data Synchronisation Network) continues its solid growth and expansion: 6 new data pools have been GDSN-certified and the GS1 Global Registry has reached the milestone of two million items.

6 new certified data pools

Six new data pools will be offering solutions compliant with the GS1 GDSN Standards BMS 2.1 (Business Message Standard version 2.1) bringing the total number of GDSN certified data pools to 26. The certification tests were performed using the GS1 GDSN Test Data Pool KATO™ and facilitated by the Drummond Group Inc, a leading interoperability and conformance testing company.

- GS1 Belgium & Luxembourg, CDB version 3.1
- GS1 China, ANCCNET version 2.0
- GS1 Croatia, eCROKAT ver. 1.1
- GS1 Greece, Synchro 3.1
- GS1 Hungary, GS1Perfect version 2.0
- GS1 Sweden, Validoo item Clarinet GDSN Connector version 3.0

A complete list of all GDSN certified data pools can be found at http://www.gs1.org/productssolutions/gdsn/support/index.html

Additional data pools will be announced as they are certified.

GDSN exceeds 2 million registered items in the Global Registry

GDSN Inc. is proud to announce that the Global Registry has exceeded 2 million items (GTINs) registered for synchronisation. Achieving the first million took almost 3 years, and just less than one year to achieve the second million. This clearly shows that the network is growing and momentum is building. We anticipate this growth trend to continue as the focus on adoption and implementation has generated interest and activity in regions not seen six months ago.

GDSN statistics can be found on the GDSN website at http://www.gs1.org/productssolutions/gdsn/implementation/adoption_stats.html.
