

GDSN welcomes two new data pools

GDSN is pleased to announce that Synquinox has successfully completed GDSN data pool certification, bringing the total number of GDSN certified data pools to 26. The new data pool will be offering solutions compliant with GS1 GDSN Standards Business Message Standard version 2.3. The certification tests were performed using the GS1 GDSN Test Data Pool Kato™ and facilitated by the Drummond Group Inc, a leading interoperability and conformance testing company.

GDSN also welcomes GHX which is operating as a duplicate data pool utilising GDSN certified data pool technology from GXS. GHX, LLC has launched the GHX Health ConneXion™ data pool, a healthcare-focused GDSN-certified data pool allowing healthcare organisations to leverage their existing connection to GHX to more readily participate in the GDSN without significant implementation costs. GHX currently connects the majority of hospitals in the U.S., as well as hospitals in Canada and nine European countries, to the suppliers from whom they purchase a large percentage of their products. Healthcare suppliers and providers not integrated to GHX have the option to participate in the Health ConneXion data pool as a standalone service.

A complete list of all GDSN certified data pools can be found at http://www.gs1.org/sites/default/files/docs/gdsn/gdsn_certified_data_pools.pdf.
