

PCN #	PCN Name	Effective Date
08-008	Healthcare Governance Recognition in GSMP	04-Nov-2008

Purpose:

This PCN communicates the role of Sector Specific User Groups and the role the GS1 Healthcare Leadership Team (HLT) plays in the governance and process of GSMP

Overview:

The GS1 Business Plan includes expansion of the GS1 System into targeted sectors. The Healthcare sector is currently the primary new sector into which GS1 is expanding. The Healthcare sector, though tangential to CPG in many ways, holds some specific needs and challenges for standardization. GS1 has been organizing this community now for several years including the creation of a global user group and a leadership team (more information on the details and make up of these groups is available).

Healthcare Sector Governance in GSMP

This change announces the recognition of the GS1 Healthcare Leadership Team as a User Group. The role is as stated in **PCN # 08-009**.

Exception

The Global Healthcare Community (GHC) has requested a specific CR form to capture additional information that is critical to the HLT's ability to prioritize and assess the CR. This form is posted on the GSMP CR web page (<http://www.gs1.org/services/gsmg/support/cr.html>) and available for use by the healthcare community at large.
