

# Track & Trace at Novartis Pharma AG

Matthias Pfletschinger

GS1 HUG Conference, Toronto – June19, 2008

## Agenda

## Novartis Company Profile

- Track & Trace
  - Drivers
  - Concept
  - Novartis Pilot
  - Complexity and Sophistication

### Our focus is on patients

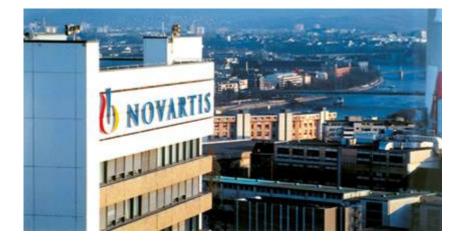

Our purpose is to care and cure. We provide medicines to treat and prevent diseases, ease suffering and improve quality of life.

### **Pharmaceuticals**

New and better medicines with improved efficacy and fewer side-effects

### **Vaccines and Diagnostics**

Human vaccines and diagnostic tools to protect against life-threatening diseases

### Sandoz

Generic pharmaceuticals that replace branded medicines after patent expiry and free up funds for innovative medicines

### Consumer Health

Readily available products that enable healthy lifestyle choices

- OTC (Over-the-Counter)
- CIBA Vision
- Animal Health

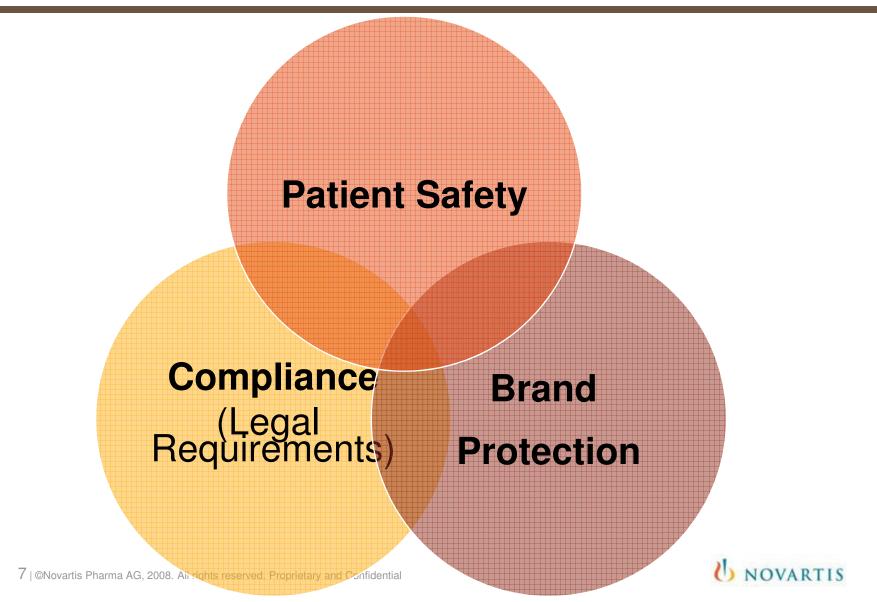

### Agenda

## Challenging Regulatory Environment

California: Effective Date of E-pedigree Law postponed to January 2011 Turkey: New Track & Trace law in place – effective January 2009/10

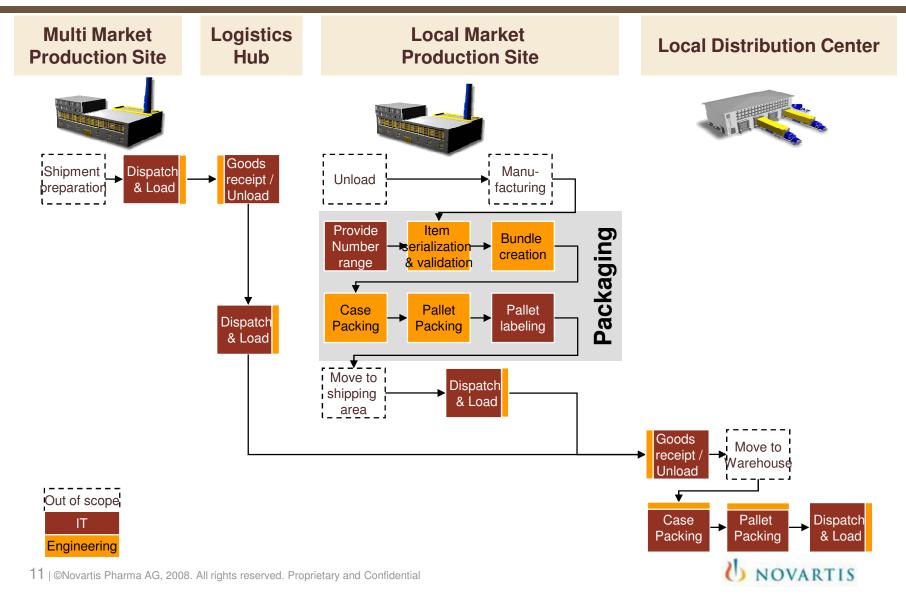

### Data concept along the supply chain Technology agnostic solution for data exchange is required

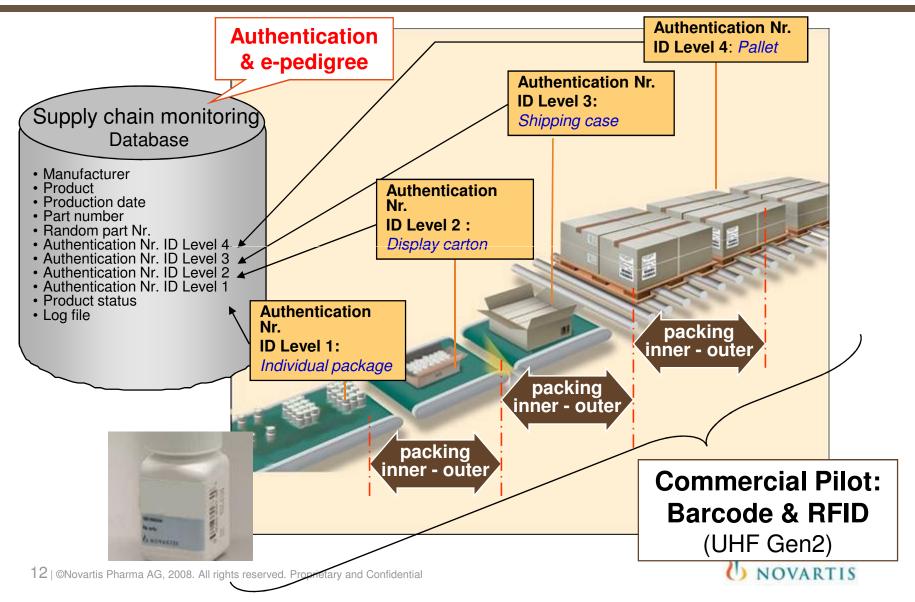

\* :Places where trace data gets recorded

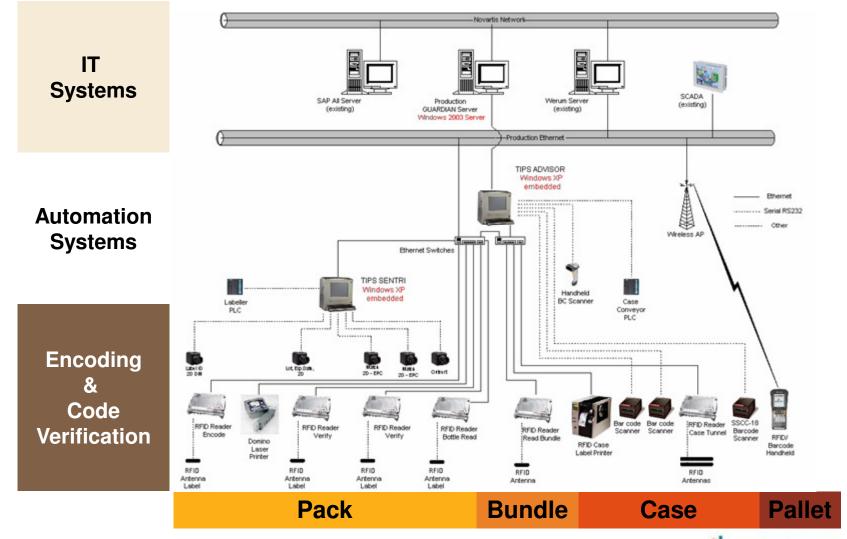

## Packaging & Distribution: Novartis Process Flow

### Packaging: Serialization of packaging hierarchy Process Requirement: Must work at line speeds of up to 400 packs /min.

Packaging: Complex & sophisticated retro-fit of Lines required Novartis Pharma – U.S. Market only: 45 Packaging Lines (own & 3rd parties)

### Distribution: Integration of complex, global Supply Network Production Sites & Distribution Centers - operated internally or by 3rd parties

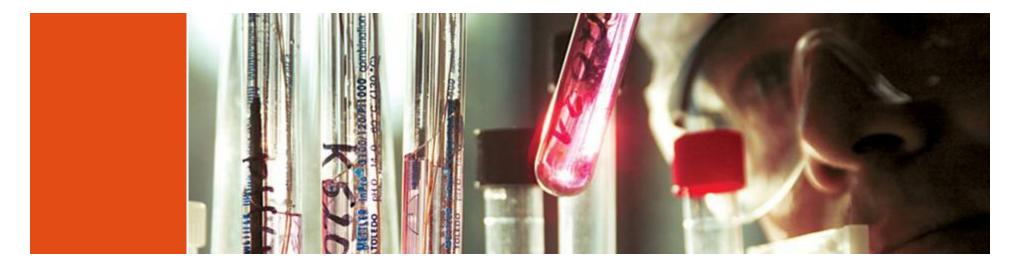

### The magnitude of the Effort - U.S. Market only Item-level Serialization & Pedigree

- Over 300 packaging configurations sold on the U.S. market
- 45 packaging lines (incl. 23 operated by contract packagers) at 15 sites in 6 countries produce for the U.S. market
- 75...85 MUSD estimated cost to comply for total U.S. volume through implementation of serialization capability (packaging) and pedigree capability (distribution centers) - operating cost not included
- Similar implementation cost for RFID vs. 2D but vastly differing operating cost
- Although a standardized approach is taken each implementation has unique features
  - Competing priorities for line time; must not disrupt supply
  - Varying line speeds, line automation equipment, floor space availability
- Novartis pilot to cover packaging, distribution and IT required involvement of 45 individuals

- Implementing Track & Trace is time consuming, complex and costly.
- Emerging technology
- Without globally harmonized standards Track & Trace implementation will be sub-optimal.
  - Standards for data carrier & content for serialization: Business Stakeholders and GS1
  - Pedigree standards (e.g. push vs. pull)
- Continued discussion/ alignment between regulatory bodies and pharma business partners is required.
