

Tag Data Standard Version 1.4

Ratified
11 June 2008

Acknowledgements:

Co-chaired by Vijay Sundhar of Ahold and Rick Schuessler of Symbol/Motorola

Editor: John Anderla of Kimberly Clark

Facilitators for TDTS WG: Mark Frey-EPCglobal Inc and Sylvia Stein-GS1 NL

Created through the hard work and many contributions from the participants of EPCglobal's SAG TDTS WG

Objectives of this version:

Enable usage of final two GS1 keys to meet emerging business needs

- GDTI (Global Document Type Identifier)
- GSRN (Global Service Relation Number)

Correct errata (GIAI-202)

Add 4th filter value to SGTIN per 60-Day EPCglobal Standards Review Action Items

Change references to GS1 (from EAN.UCC)

Update on next version of Tag Data Standards

TDS 1.5 is currently being worked on and should be completed in Q3 2008.

It will incorporate:

- Defined Requirements for User memory
- Use of GS1 General Spec Application Identifiers into User Memory
- Other issues identified in the 60-Day EPCglobal Standards Review.

Tag Data Standard Version 1.4

- Recommended for ratification by Business Steering Committee (BSC) and the Technical Steering Committee (TSC) and EPCglobal Board of Governors Technology Committee
- Reviewed by GS1 Architecture Committee and approved.
- Intellectual property claim was declared and deemed non-necessary
- Posted for community review and due process has been followed.

EPCglobal Board of Governors ratified the Tag Data Standards Version 1.4 specification as an EPCglobal standard.
