

Quarterly GSMP Management Report

April - June 2009

Overview

The GSMP Management Report was created to give a high level overview of the state of GSMP and recent outcomes. This issue covers the period of April - June 2009.

Highlights of the Quarter

Following are the key GSMP highlights of April - June 2009:

HIGHLIGHT	IMPACT
New Issue of the GSMP User Manual Released	Over the last year we have been working with our community to further improve the GSMP. These improvements are now fully documented in the new release of the GSMP Users Manual.
Enhancements to the GSMP Change Request System	The GSMP Change Request (CR) System continues to be the entry point for requests to improve the GS1 standards. Based on feedback provided by the GSMP community we made improvements in searching with new filters and added guest passwords.
Global Traceability Standard for Healthcare Implementation Guide Delivered	The Healthcare Work Group has released the GS1 Global Traceability Standard for Healthcare Implementation Guide. This business implementation guide that provides guidance to all healthcare supply chain stakeholders on implementing the Global Traceability Standard for Healthcare (GTSH).
AIDC Healthcare Implementation Guide Work Group launches	This group was formed to create a globally adaptable guideline for the implementation of AIDC Application Standards in the Healthcare industry.
GSMP Patient & Care Giver Work Group Launches	This was formed to complete the standards for identification and marking/labelling for the patient and care giver to enable AIDC applications for the care delivery process as well as unique patient identification for other purposes, such as Individual Electronic Health Records (IEHR).
Multiple Bar Codes Work Group Launches	This group was formed to assess the impact of the move toward multiple bar codes on one end-user package to make it easy for humans and machines to use bar code technology in supply chain and mobile commerce applications.
GDSN Code List Improvement UOM Work Group (Phase 2) Launches	This group was formed to harmonize and update the Unit of Measure Code List. They will also categorize and deploy smaller code lists applicable to the type of attribute as well as create clear definitions for all new and existing values in each categorized list.
Healthcare GLN Work Group Launches	This group was formed to develop new GLN assignment rules and implementation guidelines to support Healthcare business needs.

GSMP Work Analysis

The GSMP work analysis communicates the RESULTS of GSMP work effort completed and the new work that has come in.

Key Takeaways:

- Europe continues leading the submission of Change Requests
- The lower volume of GDSN CR's represents a migration away from Fast Track CR's and the new model of developing attributes as a GROUP by product classification type. The overall NUMBER of attributes year on year has gone up significantly as a result (see PCN on "Specific Technical Characteristic" Extension)

Change Request / Work Order Activity:

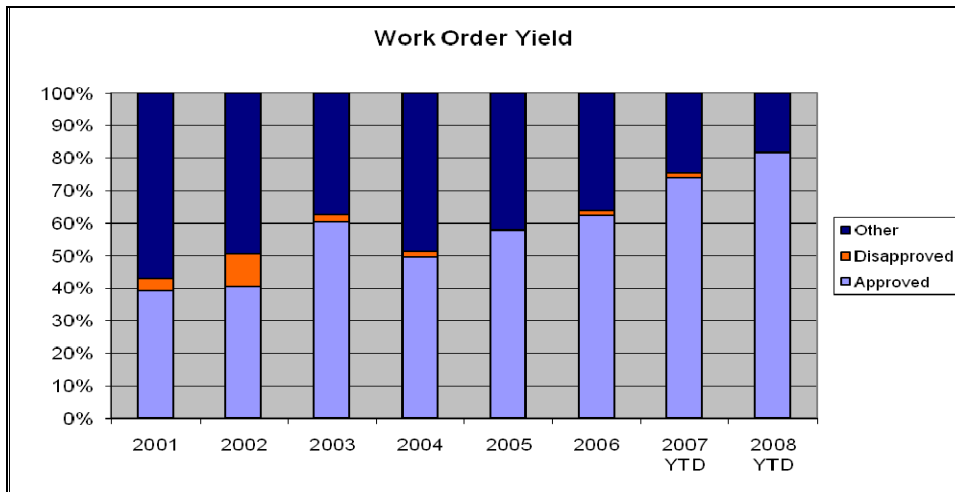

WO's closed: April - June 2009

Total Number	Approved	Solution Exists	Bundled	Withdrawn by Submitter
64	49	6	5	4

120 CR's/WO's remain open as of June 30, 2009

		2004	2005	2006	2007	2008	2009
CRs Entered by Year	Simple	23	133	253	275	177	113
	Complex	96	134	16	21	36	14
	Project				12	13	5
	Not Yet Assessed					5	5
	Total	119	267	269	308	231	137
