

2019

36th Global GS1 Healthcare Conference

New Delhi, India

5-7 November

Safer, more efficient care starts with a simple scan.

Safer, more efficient care starts with a simple scan

The 36th Global GS1 Healthcare Conference will take place from 5th to 7th November 2019 in New Delhi, India. The planned agenda promises to deliver a wealth of information, plus unique networking opportunities for all conference participants.

With a focus on patient safety, the conference themes include:

- Track and trace for access to safe medicines
- Hospitals working towards a better quality of care and increased efficiency
- Unique Device Identification (UDI)

Serving as a foundational source of information, the event brings together healthcare stakeholders, implementation partners and policymakers from around the globe to share their experiences related to healthcare and patient welfare, supported by GS1 standards.

Progress to address the worldwide challenge of providing better care, with greater efficiency, for every patient has led to increasing requirements and activities in the fields of pharmaceutical traceability, supply chain, hospital management and UDI regulation.

During the event, panel sessions will allow delegates to experience GS1 standards in action and to have discussions with their colleagues. Experts will share best practices for how to strengthen collaboration between the stakeholders involved in patient care. Moreover, to facilitate networking and knowledge sharing, we have organised site visits, a vibrant marketplace and a magical dinner event.

Together we are committed to a better and safer healthcare environment!

Take part in the GS1 Healthcare Conference in November in India

- **Benefit** by learning from your peers in a unique, neutral environment.
- **Discover** how GS1 standards can assist your organisation, your trading partners, and ultimately, the patient.
- **Learn** about the latest regulatory developments and their effects across healthcare.
- **Gain** new, worthwhile information and contacts.

Join a community working together to help transform healthcare for the benefit of patients worldwide.

About GS1 Healthcare

GS1 Healthcare is a neutral and open community bringing together all related healthcare stakeholders to lead the successful development and implementation of global GS1 standards enhancing patient safety, operational and supply chain efficiencies. For more information, visit www.gs1.org/healthcare
