

2019 | **Global GS1 Healthcare Conference**
26-28 March | Noordwijk-Amsterdam, the Netherlands

Safer, more efficient care starts with a simple scan

Safer, more efficient care starts with a simple scan

The Netherlands will provide the exciting backdrop for the 35th Global GS1 Healthcare Conference, from 26-28 March 2019. The planned agenda promises to deliver a wealth of information, plus unique networking opportunities for all conference participants.

During the opening plenary, speakers will discuss the role of GS1 standards to help address the worldwide challenge of providing the best care for each and every patient.

Throughout the three days, you will hear from many stakeholders.

Healthcare providers—business managers and clinicians alike—will demonstrate how using GS1 standards improves patient outcomes. They will share best practices for how to increase collaboration between every stakeholder involved in patient care.

Manufacturers and hospitals will explain the supply chain benefits and added value seen from implementation of global standards. Attendees will discover how standards help to reduce costs and make it easier to track and trace medicinal products. Regulatory bodies from across the world will provide you with updates about Unique Device Identification (UDI) regulations and hospitals will discuss the impact of UDI in their business and clinical processes.

Delegates will “see” GS1 standards live and in action during the conference site visits, as well as throughout the poster reception and marketplace.

The breadth of the conference’s topics and quality of its speakers will ensure you return to your organisation with new, valuable information and relationships.

Together we are committed to a better and safer healthcare environment!

Take part in the GS1 Healthcare Conference in March in the Netherlands.

- **Benefit** by learning from your peers in a unique, neutral environment
- **Discover** how GS1 standards can assist your organisation, your trading partners, and ultimately, the patient
- **Learn** about the latest regulatory developments and their effect across healthcare

By attending this conference, you will **join a community** working together to help transform healthcare for the benefit of patients worldwide.

About GS1 Healthcare

GS1 Healthcare is a neutral and open community bringing together all related healthcare stakeholders to lead the successful development and implementation of global GS1 standards enhancing patient safety, operational and supply chain efficiencies. For more information, visit www.gs1.org/healthcare
