

How GLNs contribute to the Standardization Effort in Hospital

Bettina Bartz, GS1 Germany | 23.04.2013
Postersession
GS1 Healthcare Conference, Buenos Aires

Overview about the project I

Hospital Charité´

- The **Charité** is one of the largest **university hospitals** in Europe. It's located in Berlin, Germany
- Here, 3800 doctors and scientists heal, do research and teach at the top international level
- The **Charité** also has an international reputation for excellence in training
- It extends over four campuses with more than **100 clinics** and institutes bundled under **17 Charité Centers**
- In total more than **15,000 delivery addresses** need to be maintained

Overview about the project II

Identification of right locations

Charité Mission Statement: Play an Active Role

- In total more than **15,000 delivery addresses** need to be maintained.
- The **GLN (Global Location Number)** is used to **uniquely identify locations and legal entities** from manufactures, distributors, hospitals, all the way down to nursing stations.
- **Transaction errors will be reduced** while ensuring that the **right product**, procedure and/or treatment is delivered to the **right location**.

Overview about the project III

Project Outcome using GLN

Benefits and Outcome:

- **Clean data** on delivery locations and therefore
- **Reduced error rate** (by considering the correct Internal and external delivery address)
- More **accurate purchase orders** and invoicing
- Processes **improves** the **healthcare supply chain**
- **Real-time access to GLNs** – always up-to-date
