JOSIE KING FOUNDATION

creating a culture of patient safety, together

In 2001, Sorrel King's daughter Josie died as a result of medical errors.

Consumed by grief Sorrel was determined to honor Josie's memory. She and her husband created the Josie King Foundation. Setting out to prevent patients from being harmed or killed by medical errors, she entered a world unknown to her-the health care industry.

Sorrel King has become a nationally renowned patient safety advocate. As a public speaker she travels the country spreading her message to hospitals, doctors, nurses, CEOs, board members, medical/nursing students and more in hopes that Josie's story will inspire change thus creating a better, safer healthcare industry for us all.

Sorrel has spoken to hundreds of organizations reaching thousands of healthcare professionals.

JOSIE KING FOUNDATION

creating a culture of patient safety, together

The Josie King's foundation's mission is to prevent others from dying or being harmed by medical errors.

While one of the greatest challenges that healthcare systems continue to face is patient safety, the third leading cause of death in North America is medical error.

By uniting healthcare providers as well as consumers and funding innovative safety programs, we hope to create a culture of patient safety together with you.

To continue our patient safety work, your contribution is key.

\$5 from every feedback form received will be donated to the Josie King Foundation
