GS1 in a nutshell

**The global
language of
business**

GS1 is a not-for-profit organisation that develops global standards for the identification of goods and services.

GS1's standards foster **cooperation** and encourage **information-sharing** worldwide.

Thanks to GS1, businesses and organisations can improve the **efficiency** of their supply and demand chains by adding useful information to any exchange of goods or services.

GS1 in numbers

A fully integrated global organisation, GS1 was formed in early **2005** from the joining of EAN International and the Uniform Code Council (UCC).

- **30** years of experience
- **104** member organisations representing **all points** in the supply chain
- Over a **million** companies doing business across **145** countries
- Over **20** represented sectors (FMCG, healthcare, transport, defence...)
- Over **5 billion** transactions a day

**GS1 is the most widely used
supply chain standards system in the world.**

GS1 has a full portfolio of **products**.

Global standards for automatic identification
Rapid and accurate item, asset or location identification

Global standards for electronic business messaging
Rapid, efficient & accurate business data exchange

The environment for global data synchronisation
Standardised, reliable data for effective business transactions

Global standards for RFID-based identification
More accurate, immediate and cost effective visibility of information

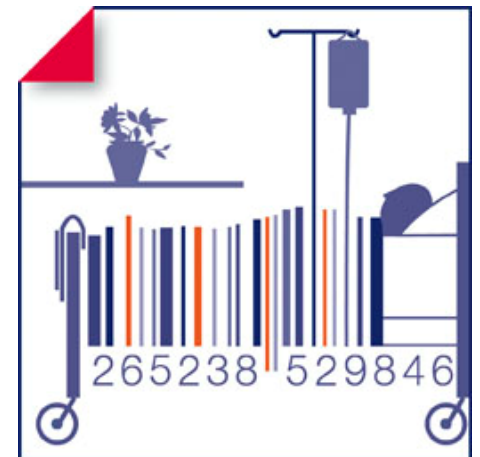

GS1 offers **solutions**, each integrating a number of GS1 products.

Traceability is a robust solution for tracking and tracing items such as medical products and food through the supply chain.

Patient Safety ensures the prevention of medical errors and counterfeiting through the healthcare supply chain.

GS1 provides a wide variety of **services** to its user companies.

- Implementation support
- Guides and manuals
- Training and education
- Helpdesk
- Benchmarking
- Verification tools and calculators
- Consulting services
- Software
- And more...
