

Tracking instruments with RFID – GS1 standards

GS1 Healthcare Webinar

Dr. Bo Danielsen, head of the School of Oral Health Care at the University of Copenhagen in Denmark, President of the Danish Society of Periodontology, Vice president of the Danish Association for Dental Health Without Borders
January 14, 2021

Welcome and thank you for attending!

- Welcome to our January 2021 webinar.
 Thank you to our guest speaker Dr. Bo Danielsen, head of the School of Oral Health
 Care at the University of Copenhagen in Denmark
- Some housekeeping for today:
 - All attendees will be in listening-only mode
 - If you have questions during the presentation, please type them into the questions area and these will be monitored then answered at the end of the call
- After the webinar:
 - Within a week, the recording will be posted to: http://www.gs1.org/healthcare/hpac webinars
 - All previous webinars are also posted to this location, so please feel free to use this resource and share the link

GS1 Healthcare Webinars

Create a forum for the global clinical provider environment for thought leaders and adopters of GS1 Standards in healthcare. The final goal: improve patient safety, cost efficiency and staff productivity through the implementation of GS1 standards.

A forum for sharing and discussion

Identification of projects and case studies

A source of expertise and advice

- The practical realities of implementation of GS1 Standards in the care giving environment in regard to the impact on clinical care and patient interaction
- Supporting the adoption of GS1 Standards in healthcare providers and retail pharmacies
- For publication, presentation and sharing
- To those involved in GS1 standards development, the wider Healthcare stakeholder community and senior executives/decision-makers to gain their buy-in and support for implementation of GS1 Standards

Specific GS1 Healthcare Activities

Webinars

- Bimonthly webinars open to all stakeholders interested in learning about GS1 standards implementation in the care giving environment.
- http://www.gs1.org/healthcare/hpac webinars

Awards

- At each global GS1 Healthcare Conference
- Provider Implementation Best Case Study Award
- Provider Recognition Award
- The prize: travel & accommodation to attend the next GS1 Healthcare conference
- http://www.gs1.org/healthcare/hpac

GS1 Healthcare holds global conferences each year. Due to the pandemic we moved in 2020 to a Virtual Event.

The next GS1 Healthcare Virtual Event is scheduled from April 20–23, 2021. We expect significant Healthcare Provider participation on the agenda.

Presenting today

Dr. Bo Danielsen

- Dental degree; MBA; master in information technology & learning
- Accreditated Assessor at dental educations in several countries in Europe and beyond
- Head of the School of Oral Health Care at the University of Copenhagen in Denmark,
- President of the Danish Society of Periodontology
- Vice president of the Danish Association for Dental Health Without Borders

Question 1

Background and interest of audience:

Dental / Medical

- Manufacturer or Supplier
- Solution Provider / IT-Developer

• GS1

Tracking instruments with RFID – GS1 standards

Bo Danielsen

January 14th, 2021

School of Oral Health Care School of Oral Health Sciences

KØBENHAVNS UNIVERSITET

The story behind our tracking instruments at our dental clinics

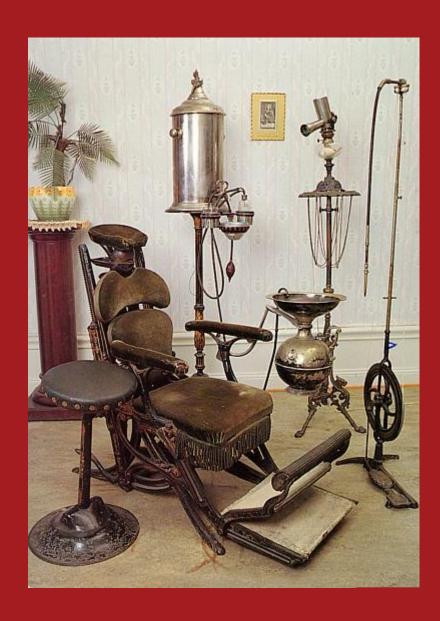

Our experiences

How we use tracking of our dental instruments to;

- 1. improve patient safety
- 2. enable documentation of infection control
- 3. improve visibility and control over stock levels
- 4. reduce inventory costs
- 5. document utilization of instruments and their lifetime
- 6. support effective maintenance
- 7. reduce time needed for manual checking of instruments
- 8. allow clinicians/students to monitor their utilization of instruments

And how we see this technology;

9. opens up for digitalizing of more functions in the dental clinic

Added tags

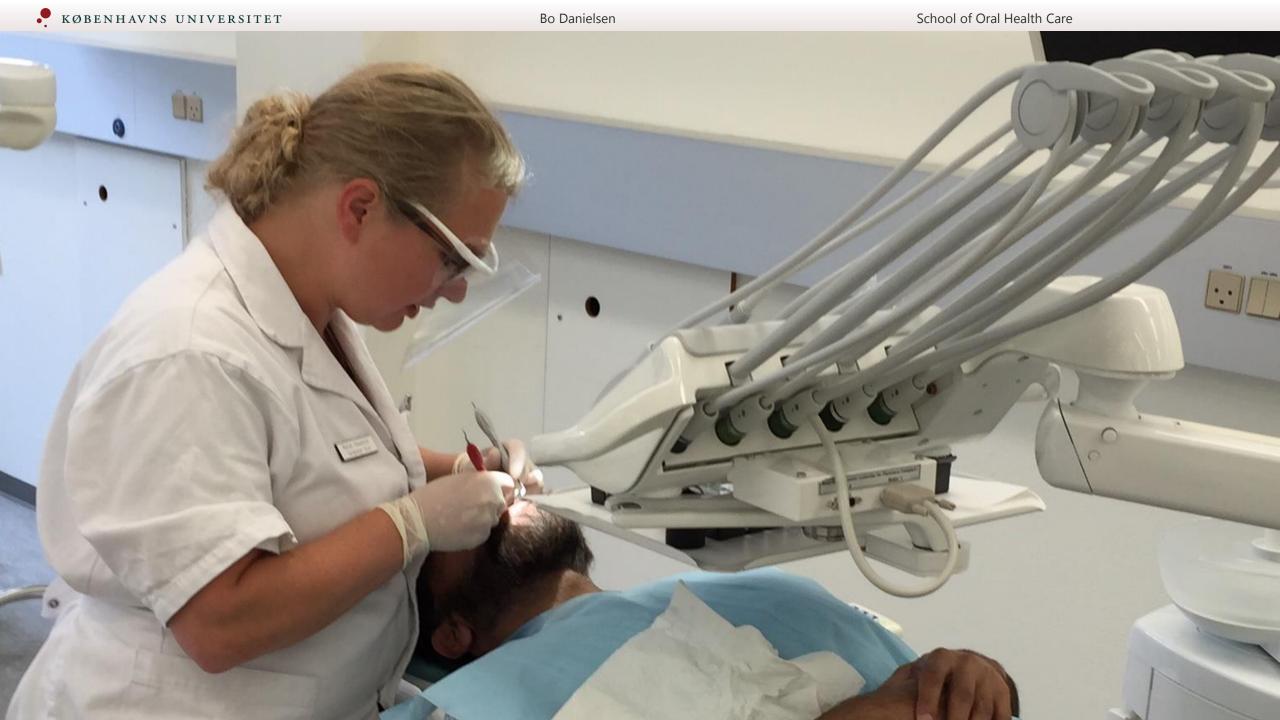

Embedded tags

Radio-frequency identification (RFID)

Studies on sterilization at dental clinics have shown a failure to achieve sterility in a significant proportion of clinics examined as a result of either appliance failure or improper handling. Therefore, it is important to check the apparatus and procedures used for sterilization

Centers for Disease Control and Prevention. Guideline for Disinfection and Sterilization in Healthcare Facilities (2008)

Instruments life in a dental clinic is now recorded in a log file

KØBENHAVNS UNIVERSITET

Improvements in clinic management

After predetermined numbers of cycles an alarm can "sent" instruments for planned maintenance

The frequency of use of the different instruments can be analysed and lifecycle estimates can be calculated to improve inventory management and investment

Different operators preference of instruments can be detected

Loss of instruments can be identified

Anti-theft alarm can be installed

Instrument used in a patient

Instrument predisinfected

Instrument stored

Instrument sterilised

Inventory with tracking system makes it easy

- to get an overview of numbers
- to get knowledge on location
- to better plan of acquisition of new instruments

Reduced inventory and thus economic savings and less space for inventory

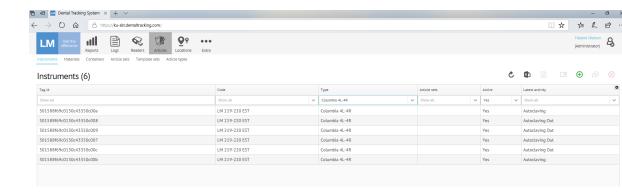

Documentations with tracking system

• for utilisation – lifetime analysis

- to identify instruments that might not be used rightly
- to identify instruments of poor quality

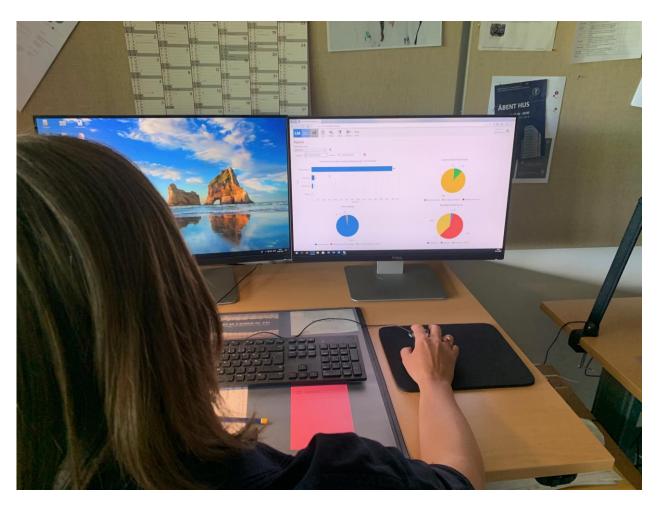

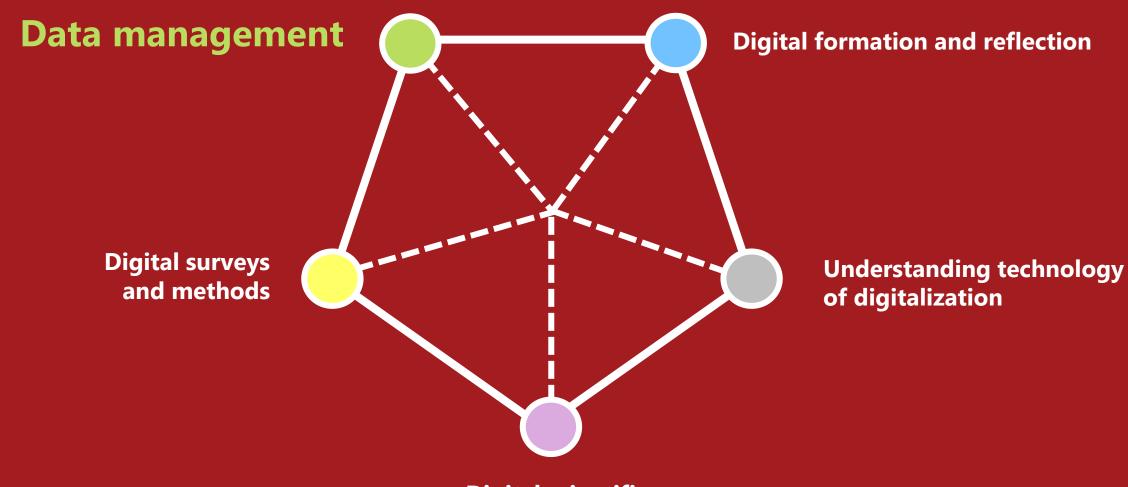

Support effective maintenance

Student studying data on her own utilization of instruments in her clinical practice

Model for digital formation and digital skills development in our educations

Digital scientific information search
