## 1 Business Solution Design

### 1.1 Business Domain View

#### 1.1.1 Problem Statement / Business Need

Collaborative Planning Forecasting and Replenishment (CPFR<sup>®</sup>) is a well documented nine step process developed and maintained by the Voluntary Interindustry Commerce Standards Association (VICS) for use by trading partners.

In the CPFR<sup>®</sup> process Bulk Data for Product Activity is a message format.

The Bulk Data for Product Activity Business Requirements Document is the output of the VICS CPFR<sup>®</sup>, GCI, the Plan BRG (Business Requirements Group) and EAN ECEG (Electronic Commerce Expert Group). It is the responsibility of the BRG's to provide the business requirements for the process of the creation and maintenance of the business and data models. The BRG's develop and maintain business process models and supporting use case diagrams, logic diagrams and data requirements for a specific business function in a global electronic commerce environment. The BRG's review and resolve change requests. The BRG's provide guidance for the technical application of new business processes and changes to existing business processes. Currently, BRG's exist for the following business processes: Align Data, Plan, Order, Despatch, Pay, After Sales Services, Asset Management, Manufacturing and Point Of Service. EAN (ECEG) covers similar functionality, through a pool of experts that liaises with the local users, ensuring the effective gathering of the business requirements from its network of national Member Organisations world-wide.

Each bulk data message is a uniform series of records of a single message type. Records criteria include width, order of fields and default values.

A bulk data description may be provided with every batch file, or a single description may be used to describe all files of that type exchanged between a buyer and a seller.

**CPFR<sup>®</sup> is the registered trademark of VICS, the Voluntary Interindustry Commerce Standards Association**

#### 1.1.2 Objective

The purpose of this Business Requirements Document is to document a process-to-data approach. The Unified Modelling Language (UML) is used for notation. Processes are clearly understood because of the use of formal modelling with the UML models. Agreed to models permit the application of the data elements to support the processes. The biggest benefit of this process-to-data approach is the alignment of the model to fit the business need.

The objective is to establish and identify the criteria for the exchange of bulk data relative to product activity.

#### 1.1.3 Audience

The audience for this document is anyone involved in collaborative planning, forecasting and replenishment

To better understand this business requirements document the audience should become familiar with the VICS CPFR<sup>®</sup> Process, the VICS CPFR<sup>®</sup> XML Messaging Model, June 13, 2001 and VICS Collaborative Planning Forecasting and Replenishment (CPFR<sup>®</sup>), Global Commerce Initiative Recommendation, June 30, 2001 as these document provide the basis and context for the business requirements

	dateDelimiter			Bulk Data Line. Date Delimiter. a1_ Text	Not available	0..1
	dateFormat			Bulk Data Line. Date Format. Date Format_ Code	Not Available	0..1
	isTrimDate			Bulk Data Line. Is Trim Date. Indicator	Not Available	1..1
	locationIdentificationFormat			Bulk Data Line. Location Identification Format. Location Identification Format_ Code	Not Available	0..1
ProductActivityBulkData				Product Activity_ Bulk Data. Details	!! This is the root class for bulk data for product activity and links a product activity bulk record to bulk data.	
		None	BulkData	Product Activity_ Bulk Data. Inheritance_ Association. Bulk Data	None	1..1

## Business Solution Design

Class (ABIE)	Attribute (BBIE)	Association (ASBIE)	Secondary Class	Official Dictionary Entry Name	Definition	Multiplicity
		recordDescriptor	ProductActivityBulkRecord	Product Activity_ Bulk Data. Product_Activity_ Record Descriptor. Product Activity_ Bulk Data Line	None	1..1
ProductActivityBulkRecord				Product Activity_ Bulk Data Line. Details	This class provides the record descriptor for the product activity bulk data and identifies the default fields, and the table as fixed field width or delimited field.	
		None	BulkRecord	Product Activity_ Bulk Data Line. Inheritance_ Association. Bulk Data Line	None	1..1
		default	ProductActivityDefault-Field	Product Activity_ Bulk Data Line. Default. Product Activity_Default_ Bulk Data Field	The default value to be used for the field when that field is not present in the file.	0..*
		None	ProductActivityDelimitedRecord	Product Activity_ Bulk Data Line. Choice_ Association. Product Activity_Delimited_ Bulk Data Line	The default value to be used for the field when that field is not present in the file.	1..1
		None	ProductActivityFixed-	Product Activity_	The default value to	1..1

## Business Solution Design

Class (ABIE)	Attribute (BBIE)	Association (ASBIE)	Secondary Class	Official Dictionary Entry Name	Definition	Multiplicity
			WidthRecord	Bulk Data Line. Choice_ Association. Product Activity_Fixed Width_ Bulk Data Line	be used for the field when that field is not present in the file.	
ProductActivityDefaultField				Product Activity_Default_ Bulk Data Field. Details	Product activity bulk records may have an assigned default or defaults. The product activity default field provides the default and has one attribute: • Value	
	productActivityDefaultValue			Product Activity_Default_ Bulk Data Field. Value. Text	The default value to be used for the field when that field is not present in the file.	1..1
		None	ProductActivityField	Product Activity_Default_ Bulk Data Field. Inheritance_ Association. Product Activity_ Bulk Data Field	None	1..1
ProductActivityDelimitedField				Product Activity_Delimited_ Bulk Data Field. Details	!! Each product activity delimited record has one or more delimited fields. This class has no attributes.	
ProductActivityDelimitedRe-				Product Activ-	A product activity	

## Business Solution Design

Class (ABIE)	Attribute (BBIE)	Association (ASBIE)	Secondary Class	Official Dictionary Entry Name	Definition	Multiplicity
cord				ity_Delimited_Bulk Data Line. Details	bulk record may be established as a product activity delimited record. This class provides the basis for the record. The product activity delimited record has two attributes: • Delimiter • Are string fields quote delimited	
	areStringFieldsQuoteDelimited			Product Activity_Delimited_Bulk Data Line. Are String Fields Delimited. Indicator	Indicator of whether string fields within the record are delimited by quotation marks.	1..1
	delimiter			Product Activity_Delimited_Bulk Data Line. Delimiter. a1_Text	Single character to be used as a field delimiter (e.g., comma, tab, or asterisk)	1..1
		None	ProductActivityBulkRecord	Product Activity_Delimited_Bulk Data Line. Inheritance_Association. Product Activity_Bulk Data Line	None	1..1
		field	ProductActivityDelimited-Field	Product Activity_Delimited_	None	1..*

## Business Solution Design

Class (ABIE)	Attribute (BBIE)	Association (ASBIE)	Secondary Class	Official Dictionary Entry Name	Definition	Multiplicity
				Bulk Data Line. Product Activity_Delimited_Field. Product Activity_Delimited_Bulk Data Field		
ProductActivityField				Product Activity_Bulk Data Field. Details	!! The product activity field class provides for the assignment of a field type code to the fields of a record. The field class has no attributes.	
	productActivityField-Type			Product Activity_Bulk Data Field. Product Activity_Field Type. Product Activity_Field Type_Code	Not Available	1..1
ProductActivityFixedWidthField				Product Activity_Fixed Width_Bulk Data Field. Details	!! Each product activity fixed width record may have one or more fields. This class links the fields to the record. The product activity fixed width field has two attributes: • Begin column number • End column number	

## Business Solution Design

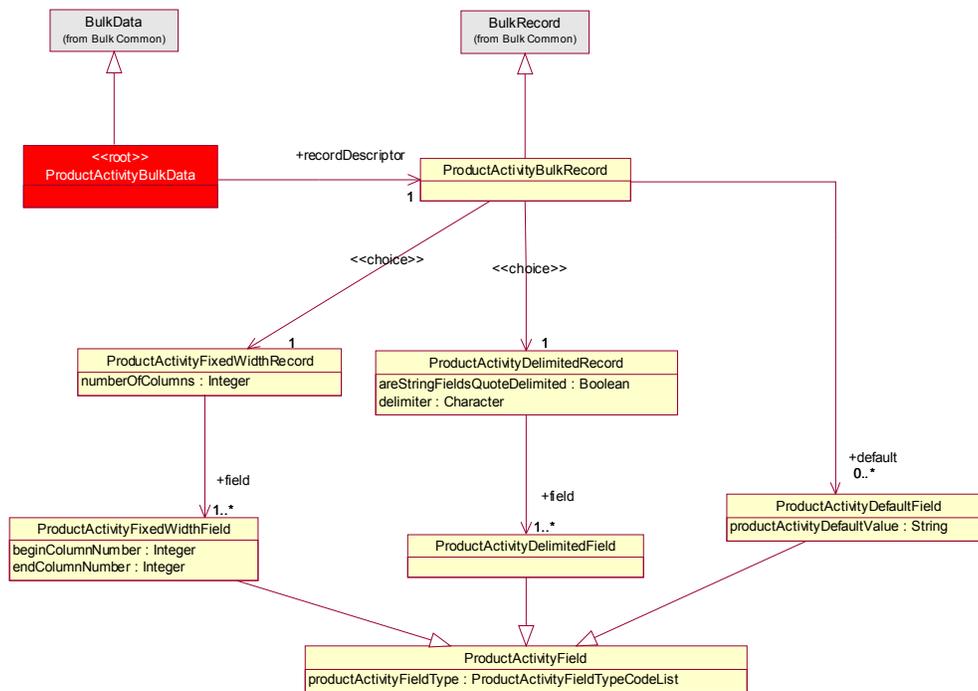

Class (ABIE)	Attribute (BBIE)	Association (ASBIE)	Secondary Class	Official Dictionary Entry Name	Definition	Multiplicity
	beginColumnNumber			Product Activity_Fixed Width_Bulk Data Field. Begin_ Column Number. Text	The beginning column number of the field. (The first column is column 1)	1..1
	endColumnNumber			Product Activity_Fixed Width_Bulk Data Field. End_ Column Number. Text	The ending column number of the field.	1..1
		None	ProductActivityField	Product Activity_Fixed Width_Bulk Data Field. Inheritance_ Association. Product Activity_ Bulk Data Field	None	1..1
ProductActivityFixedWidthRecord				Product Activity_Fixed Width_Bulk Data Line. Details	!! Each product activity bulk record may be either a fixed width record or a delimited record. This class links fixed fields to the record. This class one attribute to identify the number of columns. • Number of columns	
	numberOfColumns			Product Activity_Fixed Width_Bulk Data Line.	A count of the number of fields expected in Batch	1..1

<b>Change</b>	<b>BMS Version</b>	<b>Associated CR Number</b>

### 2. XML Technical Solution ITRG Packet

The Technical Representation of the Business process is documented in a Technical Solution ITRG Packet containing all supplemental XML artefacts and is used by the Information Requirements Group (ITRG) to evaluate the solution. Upon approval from the Information Technical Requirements Group (ITRG), the Technical Solution ITRG Packet is updated to the Technical Solution Implementers Packet and published with the Business

Message Standard at:

[http://www.ean-ucc.org/global\\_smp/ean.ucc\\_standards.htm](http://www.ean-ucc.org/global_smp/ean.ucc_standards.htm).

Technical Solution ITRG Packet Content:

- Business Message Standard (BMS)
- ITRG Review Packet
  - Style Sheet: This HTML has been created using a Style Sheet that is a visual representation of the data. It is not an actual Style Sheet, but an ex-ample of what a Style Sheet may look like.
  - Instance File: The Instance File is an example of what the schema may look like when it includes live data. This can be used as comparison to a completed schema and can serve as a point of reference for development.
  - Technical Level GDD Report

Technical Solution Implementers Packet Content:

Contains all the message specific.XSD files required to implement

Example:

- AS2Envelope
- Command.xsd
- DocumentCommand.xsd
- Proxy.xsd
- ComponentLibrary.xsd

Both the Business Message Standard and the Implementers Packet are available during the ITRG Review Period in the working documents section of the ITRG eRoom:

[http://eroom.uncouncil.org/eRoom/facility/InformationTechnicalAssessmentGroupITAG/0\\_14f7](http://eroom.uncouncil.org/eRoom/facility/InformationTechnicalAssessmentGroupITAG/0_14f7)

All documents for review will be in this folder listed by name of the Change Request and Change Request Number. The Business Message Standard is not open for review, but offered as the basis for determining the suitability of the technical solutions.

This eRoom may be accessed by using the following User Name and Password:
