Business Solution Design

1 Business Solution

1.1 Business Domain View

1.1.1 Problem Statement / Business Need

A process needs to be developed to handle the acknowledgment of payment orders, by transaction, from the financial institution to the payer. The payer submits payment requests to the financial institution. The payer has requested that the financial institution confirm receipt for processing of the payment requests.

1.1.2 Objective

To supply the detail design of the confirmation of settlement business transaction needed to meet the requirements of the referenced BRAD(s).

1.1.3 Audience

The audience for this document is the payer personnel who send requests for payment to their financial institution and financial institution payables processing departments that confirm receipt of settlement requests to the payer.

1.1.4 Artefacts

1.2 Business Context

(Note: The business context of the business)

Context Category	Value(s)
Industry	All
Geopolitical	All
Product	All
Process	Pay
System Capabilities	All
Official Constraints	None

If no value use, the default of “All” except for Official Constraints where default is “None”.

1.3 Additional Technical Requirements Analysis

1.3.1 Technical Requirements (optional)

(User Interface, Security, Performance, Quality, etc.)

Number	Statement	Rationale

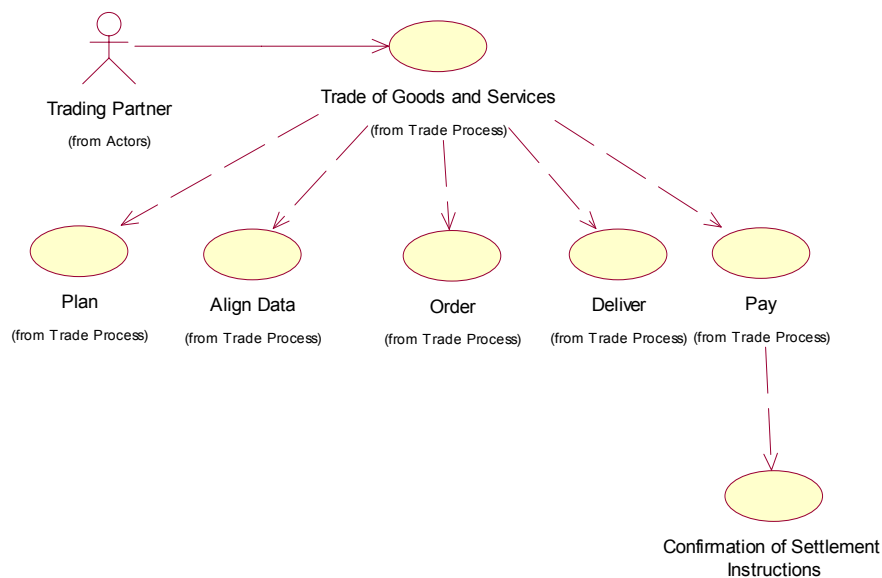

1.4 Business Transaction View

1.4.1 Business Transaction Use Case Diagram

The trading partners, the Financial Institution and the Buyer of the goods have completed their planning and align data activities. Requirements for aligning data include:

- Identifying the codes and meaning of codes for detailing the transaction status message
- Agreement on the payee and payer information to be exchanged

Then, together they must be prepared to send and receive electronic transactions.

1.4.2 Use Case Description

Use Case ID	UC-1
Use Case Name	Confirmation of Settlement Instructions
Use Case Description	The payer's financial institution has received one or more Settlement documents from the payer. The payer has requested a payment reconciliation, by transaction, of the Settlement document(s) from their financial institution.
Actors (Goal)	This is a two party system. The primary actors are the Payer (a type of buyer) and the Payer's Financial Institution (a type of third party).
Performance Goals	
Preconditions	Both parties have established their trading partner agreement, aligned their data, and are capable of sending and receiving transactions.

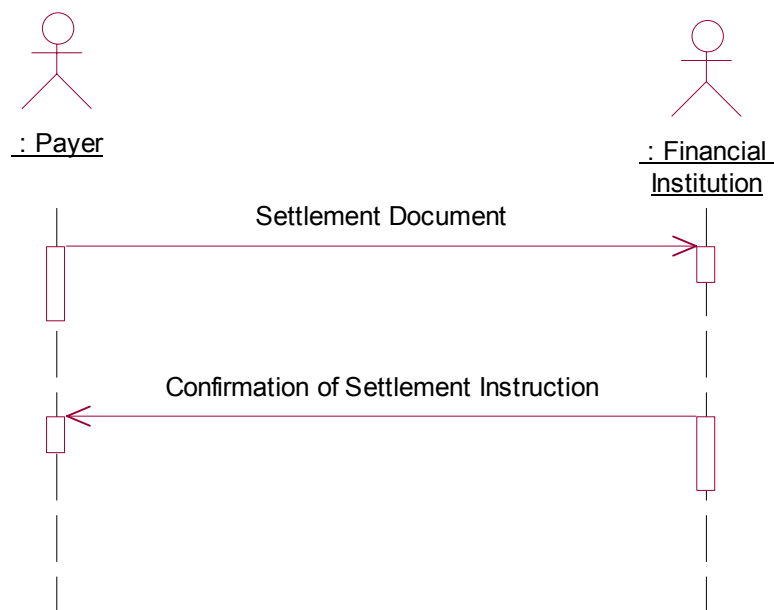

Business Solution Design

Post conditions	Successful receipt of the data by the Payer from the Financial Institution.												
Scenario	<p>Begins when the Payer submits one or more Settlement documents to the Financial Institution.</p> <p>Continues with...</p> <table border="1"><thead><tr><th>Step #</th><th>Actor</th><th>Activity Step</th></tr></thead><tbody><tr><td>1</td><td>Payer</td><td>The Payer transmits one or more Settlement documents to the Financial Institution.</td></tr><tr><td>2</td><td>Financial Institution</td><td>The Financial Institution processes the document(s) and transmits a Confirmation of Settlement Instructions (reconciliation) to the payer.</td></tr><tr><td>3</td><td>Payer</td><td>The Payer receives the Confirmation of Settlement Instructions (reconciliation) document from the Financial Institution.</td></tr></tbody></table> <p>Ends when The Payer receives a confirmation of settlement documents (reconciliation), by transaction, from the financial institution.</p>	Step #	Actor	Activity Step	1	Payer	The Payer transmits one or more Settlement documents to the Financial Institution.	2	Financial Institution	The Financial Institution processes the document(s) and transmits a Confirmation of Settlement Instructions (reconciliation) to the payer.	3	Payer	The Payer receives the Confirmation of Settlement Instructions (reconciliation) document from the Financial Institution.
Step #	Actor	Activity Step											
1	Payer	The Payer transmits one or more Settlement documents to the Financial Institution.											
2	Financial Institution	The Financial Institution processes the document(s) and transmits a Confirmation of Settlement Instructions (reconciliation) to the payer.											
3	Payer	The Payer receives the Confirmation of Settlement Instructions (reconciliation) document from the Financial Institution.											
Alternative Scenario	<p><i>(any alternatives to the above scenario)</i></p> <table border="1"><thead><tr><th>Step #</th><th>Actor</th><th>Activity Step</th></tr></thead><tbody><tr><td> </td><td> </td><td> </td></tr><tr><td> </td><td> </td><td> </td></tr></tbody></table>	Step #	Actor	Activity Step

1.4.3 Business Transaction Activity Diagram(s)

1.4.4 Business Transaction Sequence Diagram(s) (optional)

The diagram illustrates the sequence using a single request for payment. The buyer may send and the financial institution may receive one or more requests for payment at the same time.

1.5 Note: The payer is the buyer of goods and services.

1.7 Business Document Example

1.8 Implementation Considerations

1.9 Testing

1.9.1 Pass / Fail Criteria

Unit testing criteria for business solution.

Number	Test Criteria	Related Requirement	Design Element	Pass Criteria	Fail Criteria
1	Reflects a specific business requirement from a related BRAD. For example: When goods are ordered, the buyer requires an answer from the suppliers that the order has been received.	BRAD Name.Version. Req #	Message, role, attribute	Result which determines that requirement has been satisfied: For example: Seller is able to create and send an Order Receipt Acknowledgement.	Result which shows that requirement has not been satisfied: For example: Buyer does not receive the Order Receipt Acknowledgement.
2					
3					

1.9.2 Test Data

Attribute	Value
Attribute Name. For example "orderQuantity"	Valid value associated with the attribute. For example "5".

2 XML Technical Solution ITRG Packet

The Technical Representation of the Business process is documented in a Technical Solution ITRG Packet containing all supplemental XML artefacts and is used by the Information Requirements Group (ITRG) to evaluate the solution. Upon approval from the Information Technical Requirements Group (ITRG), the Technical Solution ITRG Packet is updated to the Technical Solution Implementers Packet and published with the Business

Message Standard at:

http://www.ean-ucc.org/global_smp/ean.ucc_standards.htm.

Technical Solution ITRG Packet Content:

- Business Message Standard (BMS)
- ITRG Review Packet
 - Style Sheet: This HTML has been created using a Style Sheet that is a visual representation of the data. It is not an actual Style Sheet, but an ex-ample of what a Style Sheet may look like.
 - Instance File: The Instance File is an example of what the schema may look like when it includes live data. This can be used as comparison to a completed schema and can serve as a point of reference for development.
 - Technical Level GDD Report

Technical Solution Implementers Packet Content:

Contains all the message specific.XSD files required to implement

Example:

- AS2Envelope
- Command.xsd
- DocumentCommand.xsd
- Proxy.xsd
- ComponentLibrary.xsd

Both the Business Message Standard and the Implementers Packet are available during the ITRG Review Period in the working documents section of the ITRG eRoom:

http://eroom.uncouncil.org/eRoom/facility/InformationTechnicalAssessmentGroupITAG/0_14f7

All documents for review will be in this folder listed by name of the Change Request and Change Request Number. The Business Message Standard is not open for review, but offered as the basis for determining the suitability of the technical solutions.

This eRoom may be accessed by using the following User Name and Password:
