Business Solution Design

1 Business Solution

1.1 Business Domain View

1.1.1 Problem Statement / Business Need

A message is needed that can satisfy the response to a FTL Load Tender message, whereby a motor carrier (carrier) can indicate whether or not they have accepted or rejected to move a load that has been tendered.

1.1.2 Objective

To supply the detail design of a FTL Load Tender business transaction needed to meet the requirements of the referenced BRAD(s).

1.1.3 Audience

The audience of the standards would be any participant in the global supply chain. This would include carriers, and their customers and partners.

1.1.4 Artefacts

Artefact name	State	Artefact / State description
BRW FTL Load Tender Response Version 1.3		Deliver BRG approved this BRW. This BRW was the source to create the first draft BRD.
Change Request # 03-000119		Change request objective was to create a business message standard to provide a response to the FTL Load Tender business message, which was approved in 2002, harmonized and published in July 2003.

1.4.2 Use Case Description

Use Case ID	UC-1													
Use Case Name	Response to FTL Load Tender													
Use Case Description	N/A													
Actors (Goal)	<table border="1"> <thead> <tr> <th>Actor's Name</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>Carrier</td> <td>Party responsible for the transport of freight/goods.</td> </tr> <tr> <td>Consignor</td> <td>Party requesting the shipment of the freight/goods.</td> </tr> <tr> <td>Consignee</td> <td>Party identified as the final recipient of freight/goods. A consignee can also be a party requesting the shipment of the freight/goods.</td> </tr> <tr> <td>Third Party</td> <td>Entity providing services to party/parties associated with a shipment. Often acting on the behalf of a consignor and/or consignee.</td> </tr> <tr> <td>Recipient of FTL Load Tender Response</td> <td>This is the aggregation of the three various actors (Consignor, Consignee, Third Party) who can receive a FTL Load Tender Response.</td> </tr> </tbody> </table>		Actor's Name	Description	Carrier	Party responsible for the transport of freight/goods.	Consignor	Party requesting the shipment of the freight/goods.	Consignee	Party identified as the final recipient of freight/goods. A consignee can also be a party requesting the shipment of the freight/goods.	Third Party	Entity providing services to party/parties associated with a shipment. Often acting on the behalf of a consignor and/or consignee.	Recipient of FTL Load Tender Response	This is the aggregation of the three various actors (Consignor, Consignee, Third Party) who can receive a FTL Load Tender Response.
Actor's Name	Description													
Carrier	Party responsible for the transport of freight/goods.													
Consignor	Party requesting the shipment of the freight/goods.													
Consignee	Party identified as the final recipient of freight/goods. A consignee can also be a party requesting the shipment of the freight/goods.													
Third Party	Entity providing services to party/parties associated with a shipment. Often acting on the behalf of a consignor and/or consignee.													
Recipient of FTL Load Tender Response	This is the aggregation of the three various actors (Consignor, Consignee, Third Party) who can receive a FTL Load Tender Response.													
Performance Goals	None													
Preconditions	<p>An explicit agreement between the carrier and the consignor, consignee or third Party to send/receive a FTL Load Tender Response message.</p> <p>A FTL Load Tender message was sent by a consignor, consignee, or third party and received by the carrier.</p>													
Post conditions	<p>Successful End Condition: The carrier communicates acceptance or rejection (using the FTL Load Tender Response message) and the consignor, consignee, or third party receives the accepted or rejected FTL Load Tender Response message.</p> <p>Failed End Condition: When a response is required, and FTL Load Tender Response is not received</p>													
Scenario	<p>Begins when the carrier initiates the response to the FTL Load Tender Message from the consignor, consignee, or third party.</p>													

Business Solution Design

	Continues with...	
	Step #	Actor
	1	Carrier
	2	Carrier
		Activity Step
		Determines whether or not the Load Tender can be fulfilled (based on the carrier's knowledge of the requirements necessary to carry the goods specified in the Load Tender message.)
		Responds with an accept or reject message to the consignor, consignee, or third party.
		Receives the carrier's load acceptance or rejection.
	Ends when the consignor, consignee, or third party receives the FTL Load Tender Response to the FTL Load Tender from the carrier.	
Alternative Scenario	<p>Alternative Scenario 1 (see below): Carrier acceptance of the FTL Load is implied with no FTL Load Tender Response expected or given per trading partner agreement.</p> <p>Alternative Scenario 2 (see below): Carrier rejects the FTL Load and no response expected or given per trading agreement.</p> <p>Alternative Scenario 3 (see below): The consignor, consignee, or third party modifies the original load tender resulting in a loop (back to step 1) until acceptance is reached.</p>	
Related Requirements	None	
Related Rules	None	

Alternative Scenario 1

Step #	Actor	Activity Step
1	Carrier	Determines whether or not the Load Tender can be fulfilled (based on the carrier's knowledge of the requirements necessary to carry the goods specified in the Load Tender message).
2	Consignor, Consignee, or Third Party (Recipient of FTL Load Tender Response)	Carrier acceptance of the load is implied with no response expected or given per trading agreement.

Alternative Scenario 2

Step #	Actor	Activity Step
1	Carrier	Determines whether or not the Load Tender can be fulfilled (based on the carrier's knowledge of the requirements necessary to carry the goods specified in the Load Tender message.)
2	Consignor, Consignee, or Third Party (Recipient of FTL Load Tender Response)	Carrier rejects the load and no response expected or given per trading agreement.

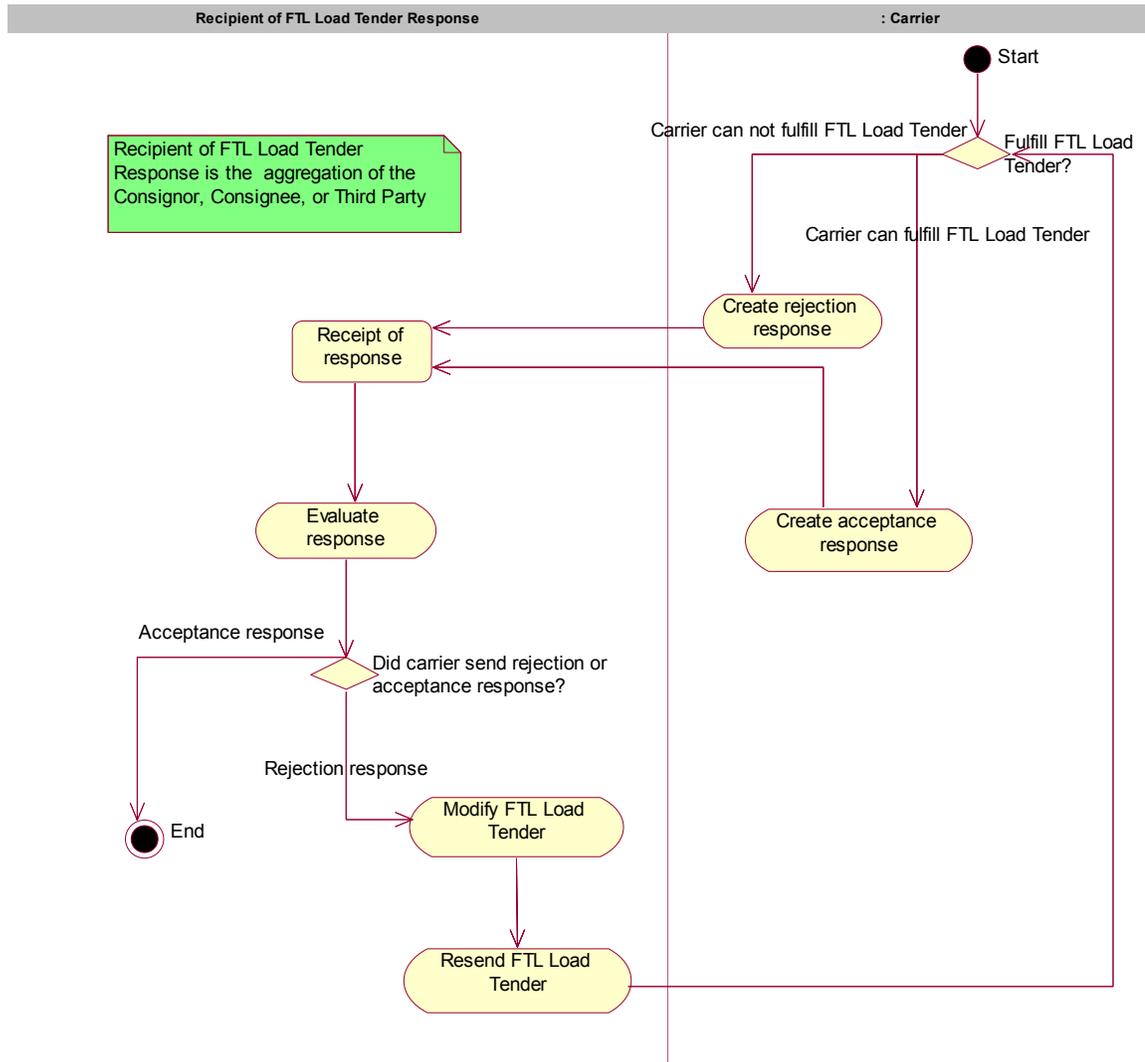

Business Solution Design

Alternative Scenario 3

Step #	Actor	Activity Step
1	Carrier	Determines whether or not the Load Tender can be fulfilled (based on the carrier's knowledge of the requirements necessary to carry the goods specified in the Load Tender message.)
2	Carrier	Responds with a rejection message to the consignor, consignee, or third party.
3	Consignor, Consignee, or Third Party (Recipient of FTL Load Tender Response)	Receives the carrier's rejection.
4	Consignor, Consignee, or Third Party (Recipient of FTL Load Tender Response)	The consignor, consignee, or third party modifies the original load tender resulting in a loop (back to step 1, to the same or alternate carrier) until acceptance is reached.

1.7 Implementation Considerations

1.8 Testing

1.8.1 Pass / Fail Criteria

Unit testing criteria for business solution.

Number	Test Criteria	Related Requirement	Design Element	Pass Criteria	Fail Criteria
1	<i>Reflects a specific business requirement from a related BRAD. For example: When goods are ordered, the buyer requires an answer from the suppliers that the order has been received.</i>	<i>BRAD Name.Version. Req #</i>	<i>Message, role, attribute</i>	<i>Result which determines that requirement has been satisfied: For example: Seller is able to create and send an Order Receipt Acknowledgement.</i>	<i>Result which shows that requirement has not been satisfied: For example: Buyer does not receive the Order Receipt Acknowledgement.</i>
2					
3					

1.8.2 Test Data

Attribute	Value
<i>Attribute Name. For example "orderQuantity"</i>	<i>Valid value associated with the attribute. For example "5".</i>

1.10 Summary of Changes

(Details changes to BMS for each version by BMS Section)

Change	BMS Version	Associated CR Number
•		

2 XML Technical Solution ITRG Packet

The Technical Representation of the Business process is documented in a Technical Solution ITRG Packet containing all supplemental XML artefacts and is used by the Information Requirements Group (ITRG) to evaluate the solution. Upon approval from the Information Technical Requirements Group (ITRG), the Technical Solution ITRG Packet is updated to the Technical Solution Implementers Packet and published with the Business

Message Standard at:

http://www.ean-ucc.org/global_smp/ean.ucc_standards.htm.

Technical Solution ITRG Packet Content:

- Business Message Standard (BMS)
- ITRG Review Packet
 - Style Sheet: This HTML has been created using a Style Sheet that is a visual representation of the data. It is not an actual Style Sheet, but an ex-ample of what a Style Sheet may look like.
 - Instance File: The Instance File is an example of what the schema may look like when it includes live data. This can be used as comparison to a completed schema and can serve as a point of reference for development.
 - Technical Level GDD Report

Technical Solution Implementers Packet Content:

Contains all the message specific.XSD files required to implement

Example:

- AS2Envelope
- Command.xsd
- DocumentCommand.xsd
- Proxy.xsd
- ComponentLibrary.xsd

Both the Business Message Standard and the Implementers Packet are available during the ITRG Review Period in the working documents section of the ITRG eRoom:

http://eroom.uncouncil.org/eRoom/facility/InformationTechnicalAssessmentGroupITAG/0_14f7

All documents for review will be in this folder listed by name of the Change Request and Change Request Number. The Business Message Standard is not open for review, but offered as the basis for determining the suitability of the technical solutions.
