

Business Message Standard

Read Me First

Version 2.1

January 2007

Read Me First

This Business Message Standard publication package provides the necessary information to implement this message as part of the EAN.UCC System. The information contained within this package is a direct result of the work conducted by the Global Standards Management Process' Business and Technical Requirements Groups.

The package content is actually a single source collection of material that will provide the necessary basics to understand and implement this EAN.UCC Business Message Standard (BMS). Section 1 of the BMS called the Business Solution Design (BSD) originates from business requirements defined by the Business Requirements Groups. Section 2 specifies the technical components provided in the package needed to implement the message.

The implementer of these standards needs to be aware of the interrelationship amongst the XML Schemas and the importance of using only interoperable versions.
