

# “GS1 Japan Scan”

## New App for a simple check of GS1 Barcodes

It has been more than 10 years since the healthcare industry started using GS1 barcodes. However, we still find some barcodes that do not fulfil the requirements of GS1 Standards.

**“GS1 Japan Scan” is to**

- promote GS1 barcodes, and
- prevent issues caused by the misuse of GS1 Standards.

### Basic functions

- Capture a barcode symbol
- Check whether the symbol is GS1 barcode

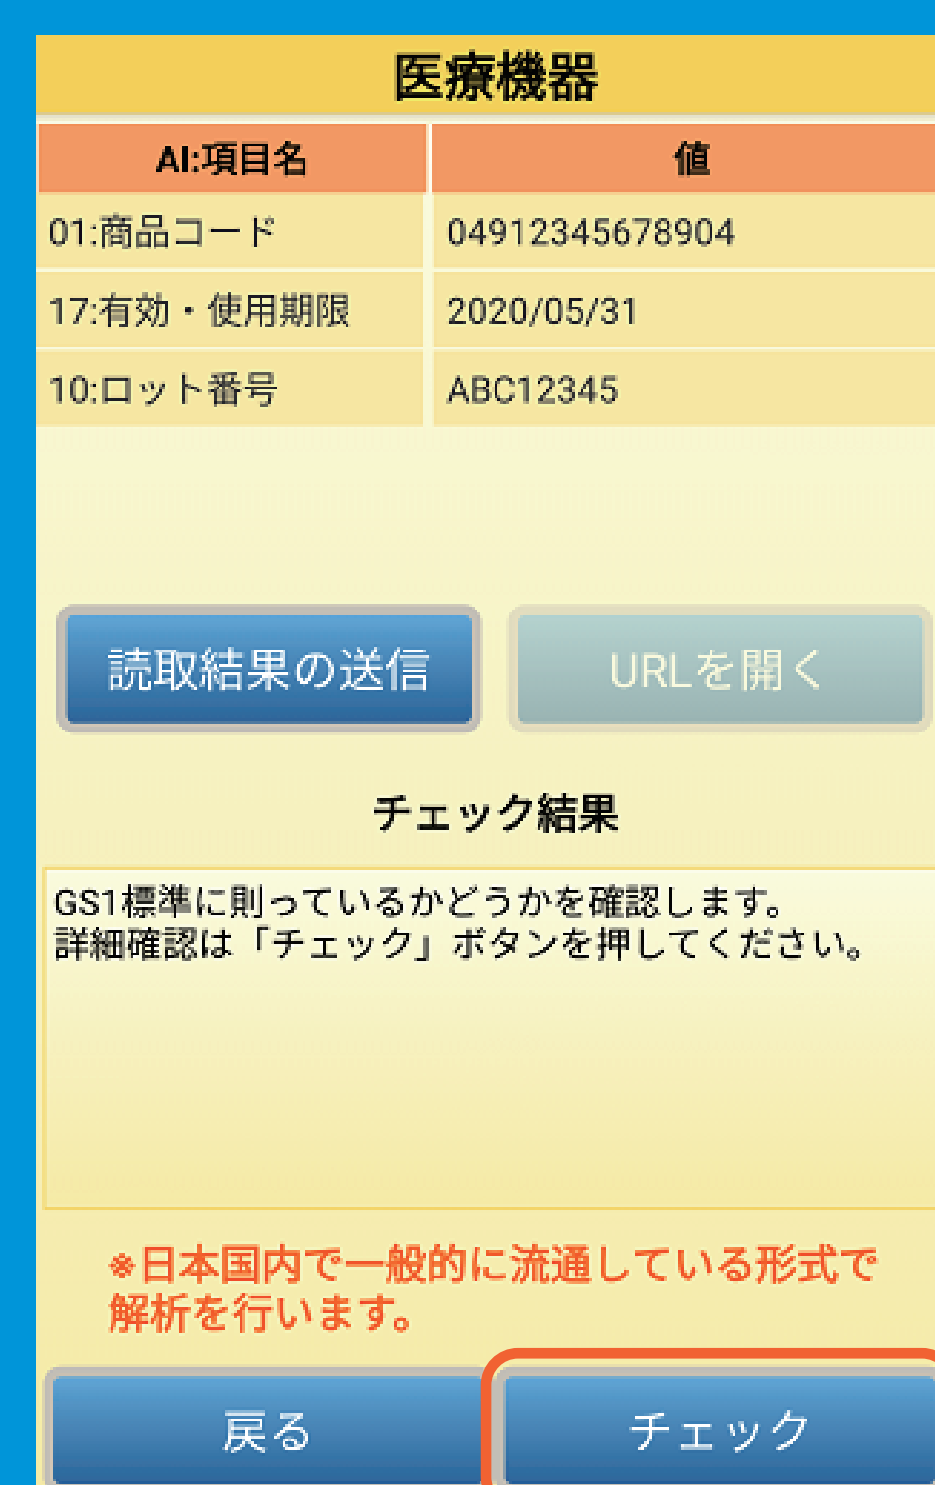

### Consistency check against the guidelines on medical device and medication

- Check whether a barcode consists of data required by the Ministry of Health, Labour and Welfare (MHLW)

Medical Device

Check

All good as a barcode for MD

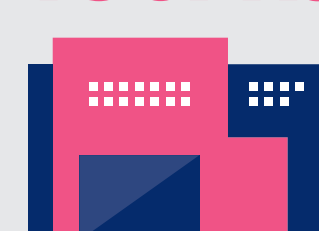

### Benefits of GS1 Japan Scan:

#### For Manufacturers

Allow for a simple check before actual printing of the barcode on the products.

#### For Distributors

Allow for findings of the cause of reading error (caused by an inappropriate barcode or system problem)

Japanese version is available at,
