Global regulatory alignment

#### Description

Continue to be the open, neutral source for regulatory agencies and other government organisations to drive harmonised uptake of global standards.

#### Processes

**Physical flow** 

Transactional data

#### **Strategies**

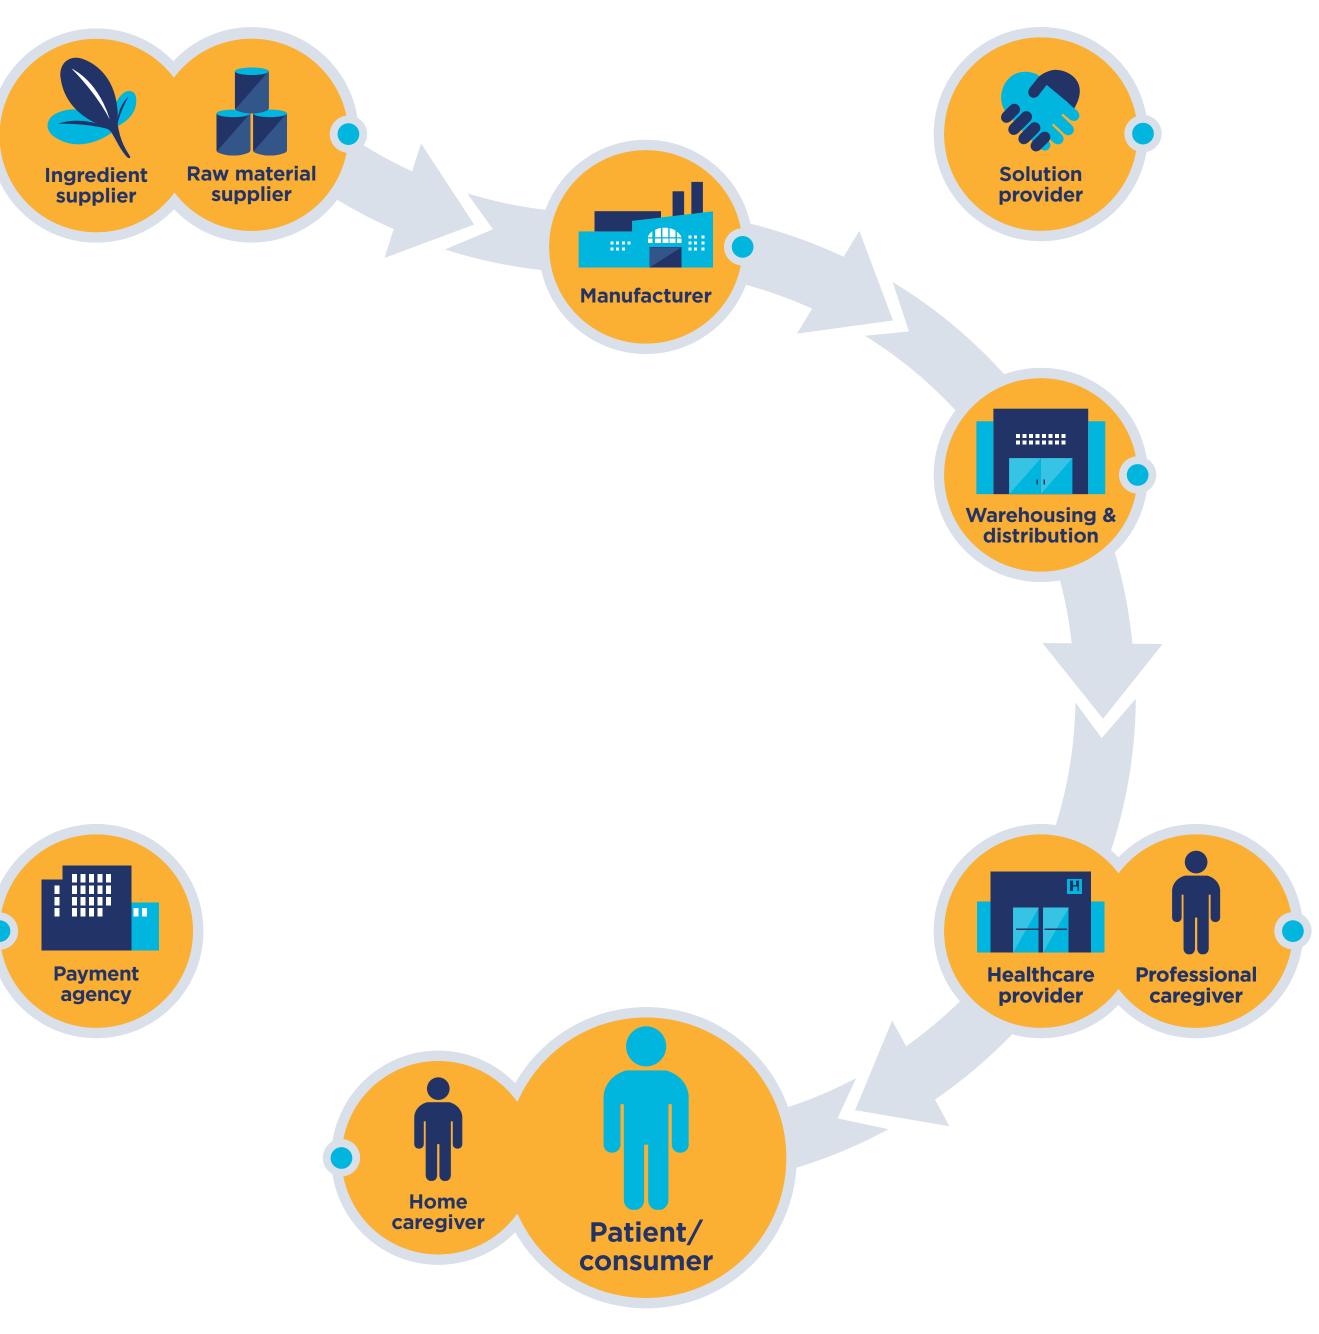

**Current business** 

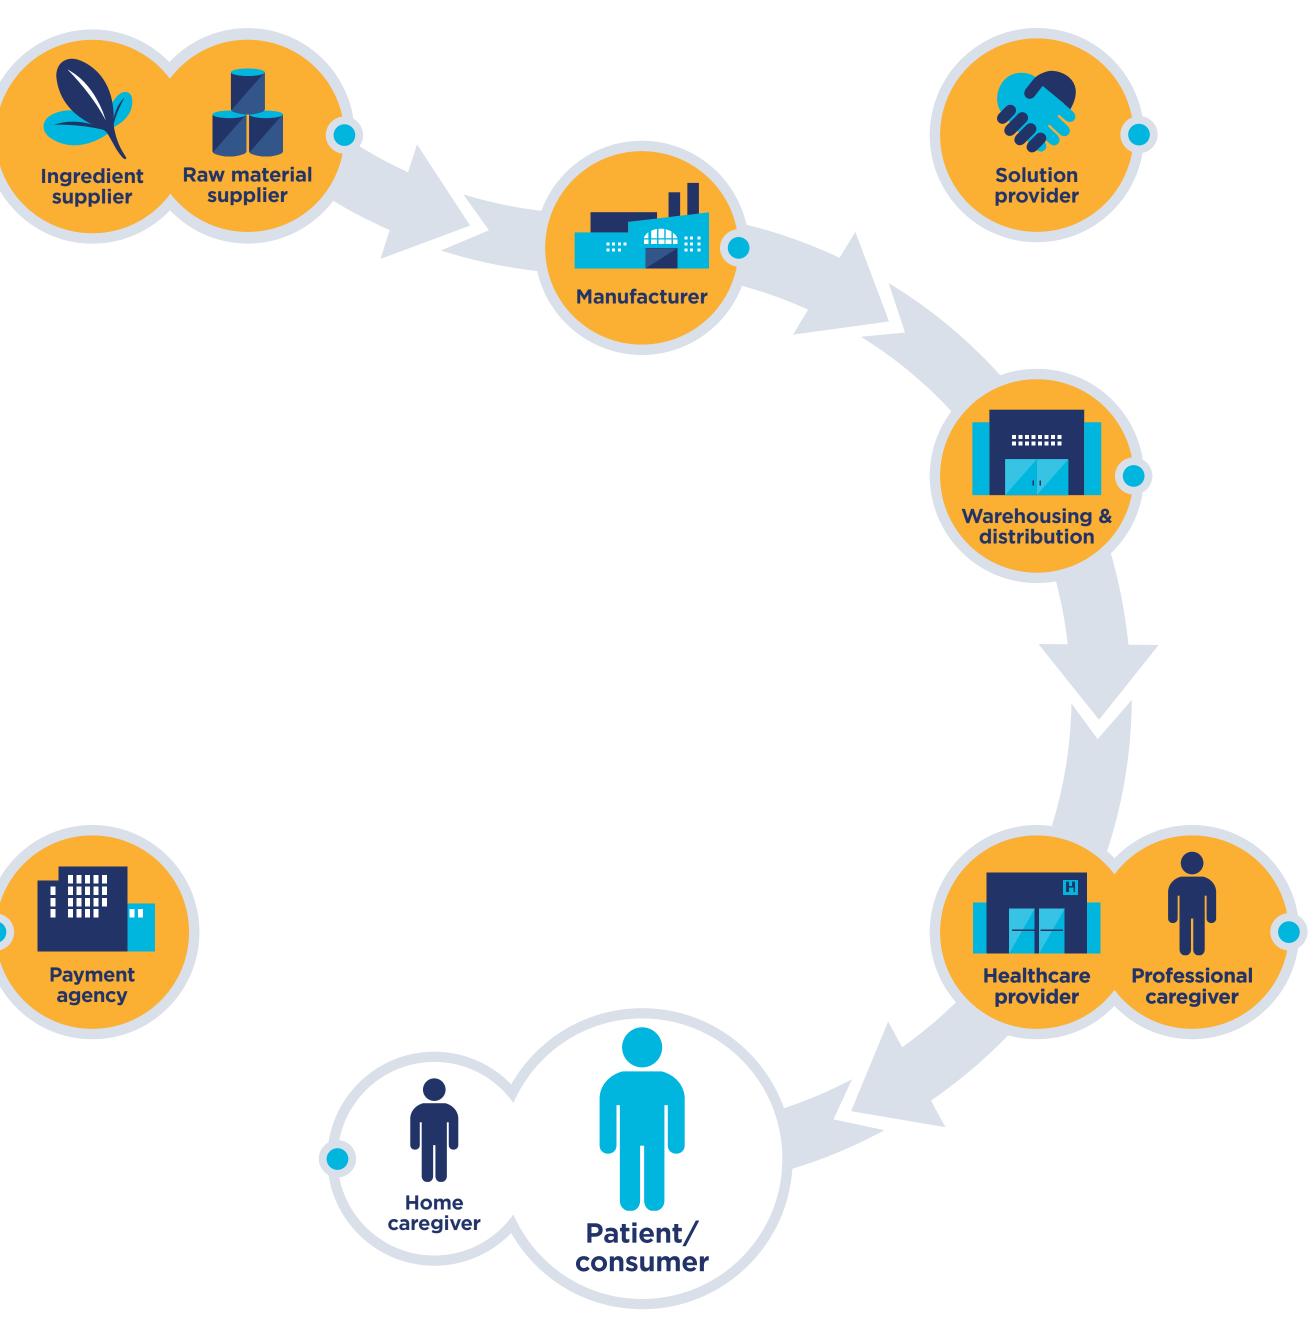

Security/traceability/ anti-counterfeiting

#### Description

Continue to educate, support and assist with implementation of global standards to ensure supply chain security and medical product traceability and help to prevent counterfeit product entering the legitimate supply chain.

#### Processes

**Physical flow** 

Transactional data

#### **Strategies**

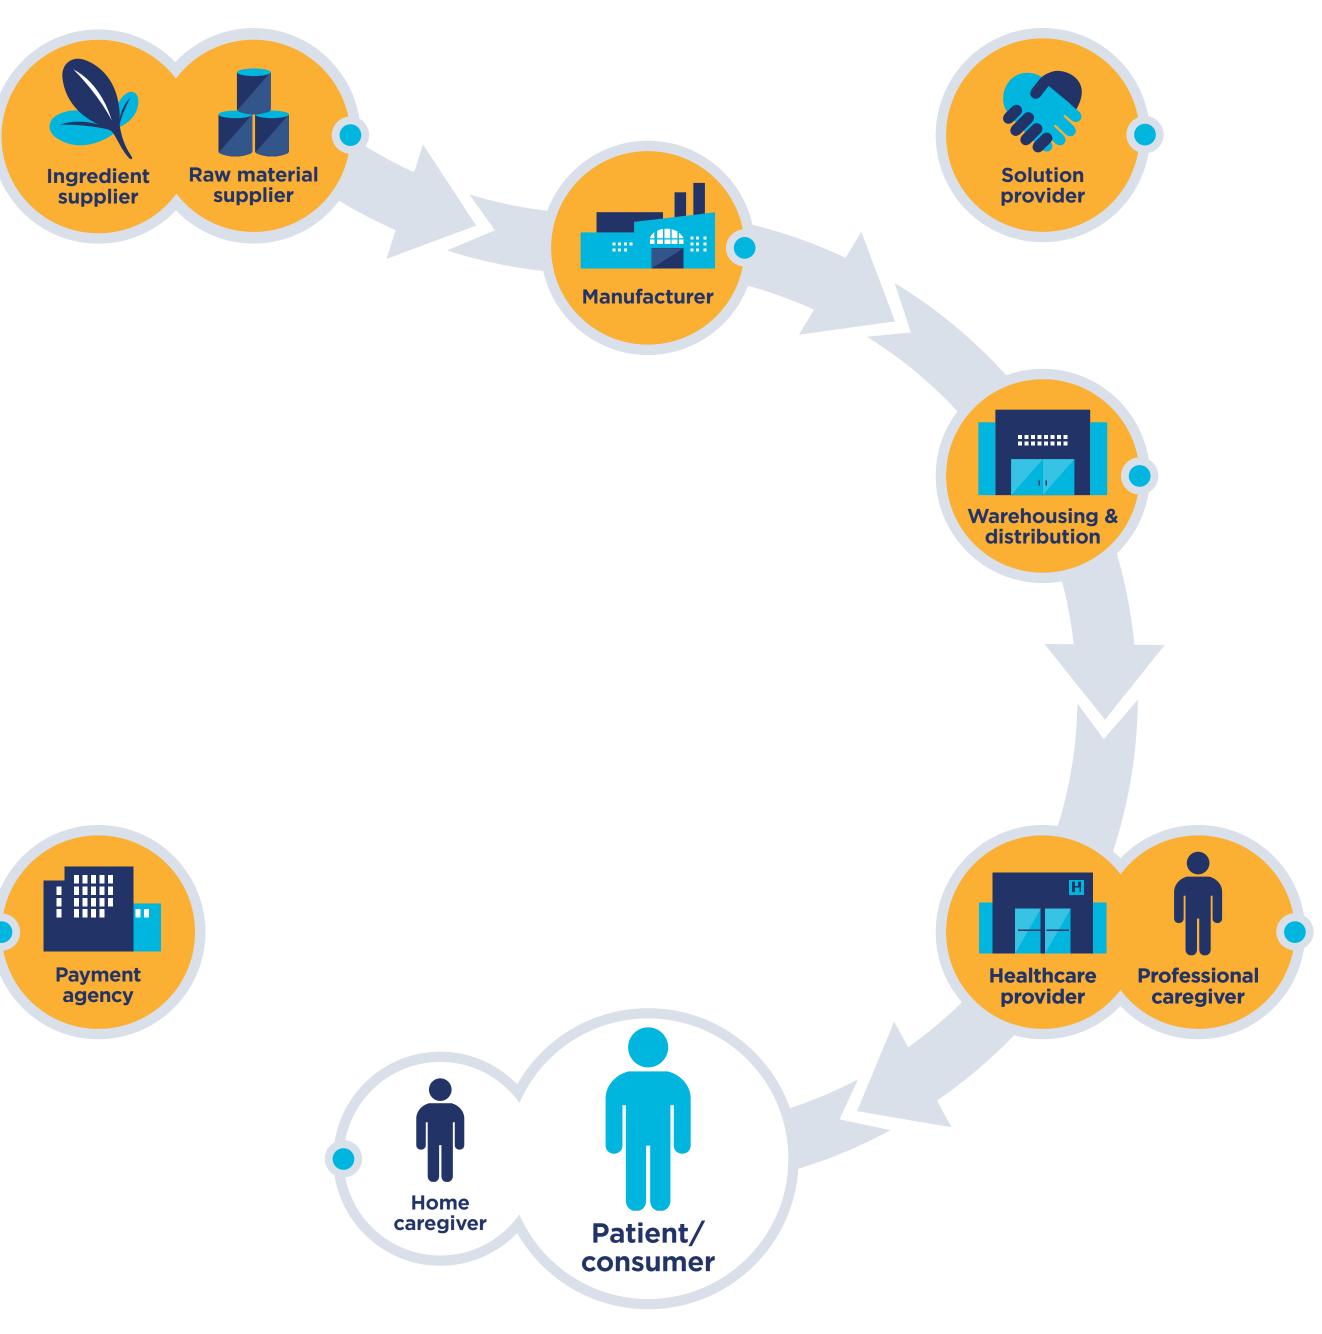

**Current business** 

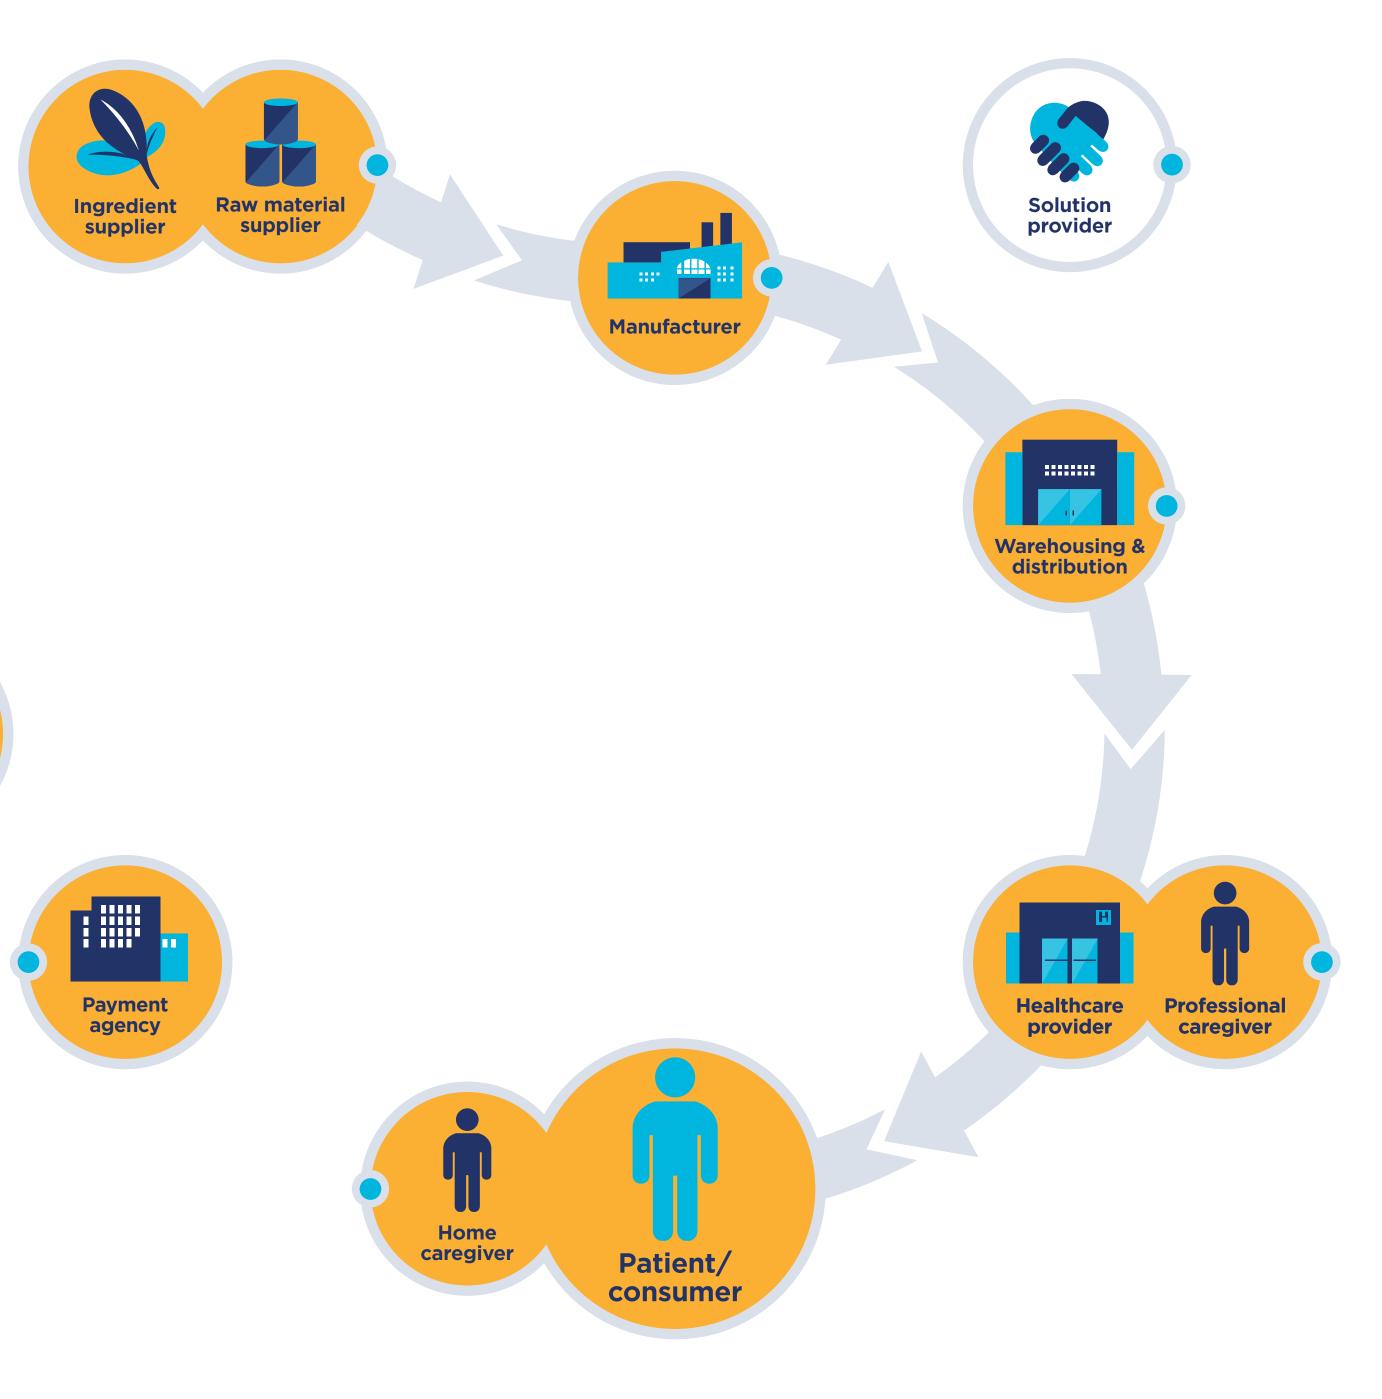

Data quality and completeness

#### Description

Promote use of global standards to enable accurate, consistent, complete and timely product master data and transactional data to be shared between healthcare stakeholders.

#### Processes

Transactional data

#### **Strategies**

**Current business** 

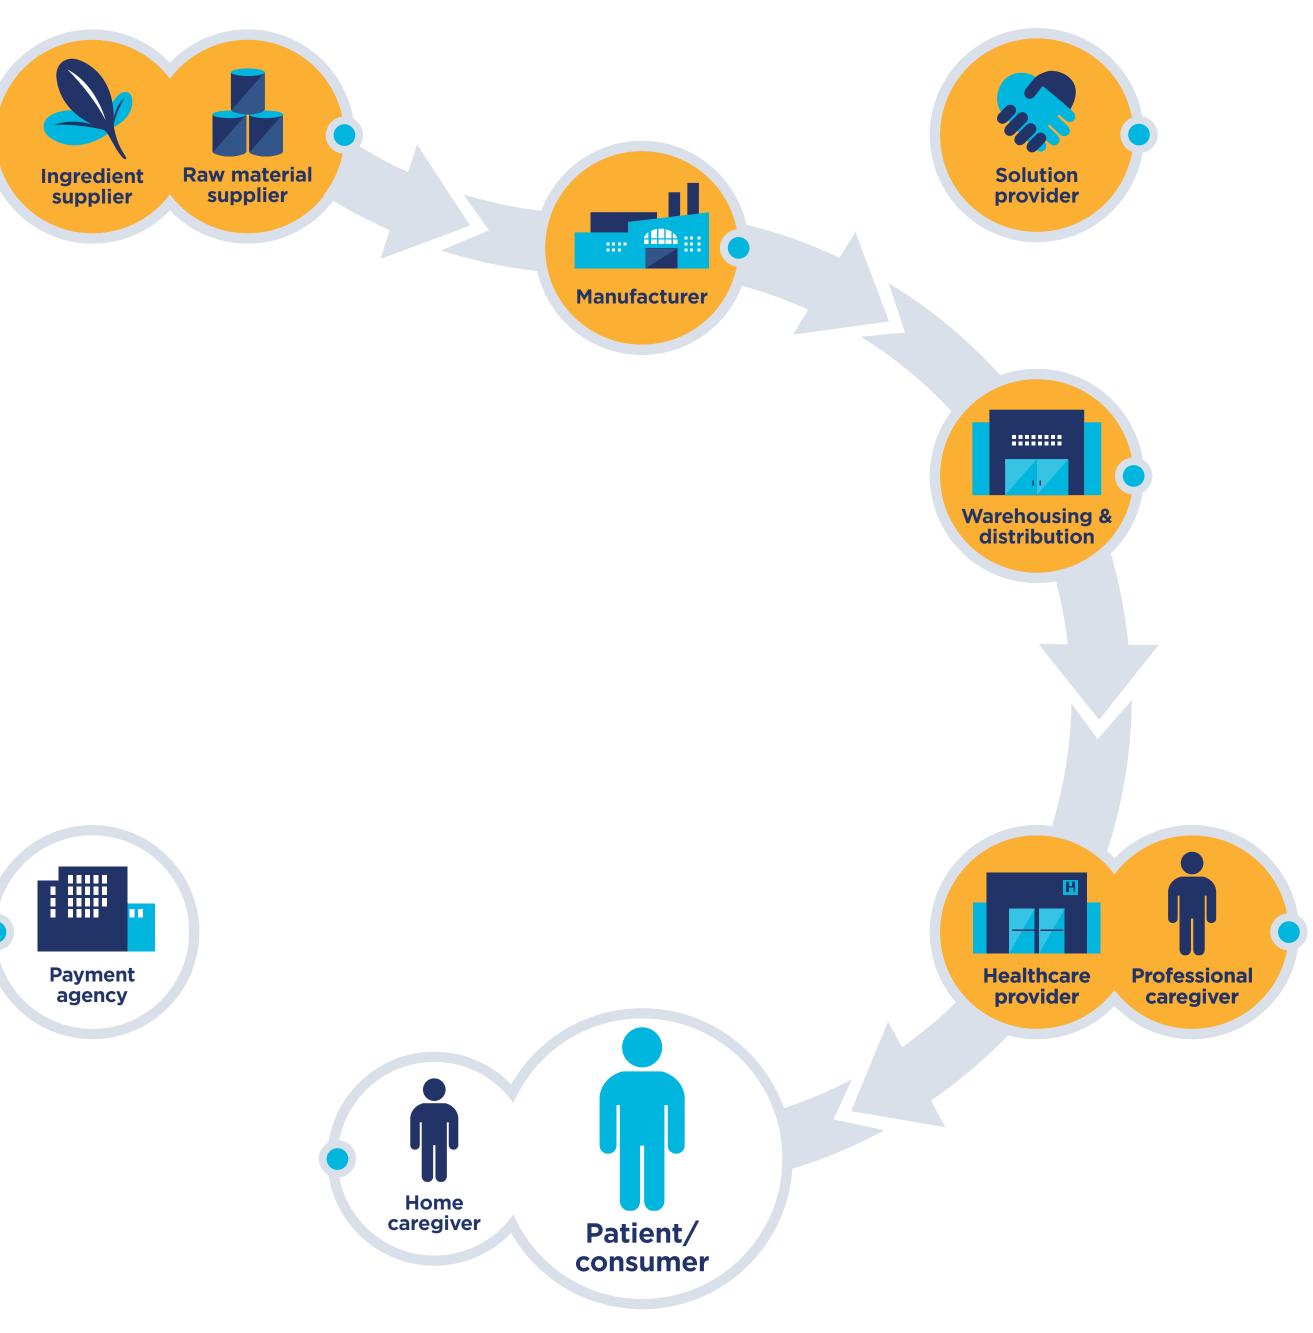

Operationalisation of standards

#### Patient/provider

#### Description

Continue to educate and help drive deeper implementation of GS1 identification keys and data carriers (e.g., GTIN, GLN, SSCC) to make their use commonplace across all healthcare stakeholders and increase interoperability.

Patient/provider

**Digital bridge** 

#### Description

Create an interoperable architecture to allow a single GS1 barcode on a medical product package to be scanned and have the user, depending on their characteristics (e.g., consumer, healthcare provider), be able to access the needed online product information, complementing reliance on information on the label. With that, drive the efforts towards ONE global barcode on medical product packages.

Disruptive

#### Description

Research and monitor technology developments that may impact GS1's role in the healthcare environment. Upon identification of areas of impact/opportunities, engage the digital disruptors to encourage them to use GS1 standards, as necessary undertake relevant standards development activities and support implementation activities.
