

2018 3rd Quarter Executive Summary

Global Standards Management Process (GSMP)

Great news! Hosted by GS1 Ireland, the GS1 Industry & Standards Event took place in Dublin this past September. As the highest attended Industry & Standards Event to date, attendees had a busy week full of sessions focused on developing standards, industry engagement, solutions & innovation, and implementation success sharing. The week included sessions on hot topics such as Fighting Illicit Trade, Mobile Ready Hero Images, the GS1 Cloud, Traceability and many more. It is always a great week when the GS1 community comes together with such enthusiasm to learn, share and work together to build the future with common goals!

With the same spirit of collaboration in mind, the next event we have to look forward to is the GS1 Standards Event, being co-located with GS1 Connect in Denver, Colorado USA on 17-18 June 2019. This event enables attendees to experience developing standards and seeing them in action, in one location!

Regards, Andrew Hearn; Vice President, GSMP

GSMP delivers in Q3

- An addendum to the **Identification of Components and Parts in the Rail Industry Application Standard** to add dos and don'ts for Identification of Components and Parts
- Updates to the **Healthcare GLN Implementation Guideline** to provide implementation guidance for those considering the use of the GS1 Global Location Number (GLN) in healthcare
- Updates to the **General Specifications Standard** to separately identify pieces of a large trade item when the pieces are shipped separately in some quantity within different logistic units
- Updates to the **General Specifications Standard** to meet a regulatory requirement for a Marine Requirement Certificate
- A new Application Standard for **Uniform Resource Identifier (URI) Structure (now known as GS1 Digital Link)** to define a standard structure for URIs that enables reliable encoding of GS1 identifiers and sub-identifiers, regardless of domain name, such that those keys can be extracted without looking up information on (or even being connected to) the web
- Updates to the **Product Image Specification i3.2 Standard** for images saved with transparent backgrounds
- A new **Mobile Ready Hero Images Guideline** for product images presented in online retail environments on small screens, typically alongside 'add to basket' function Updates to the Product Image Specification i3.2 Standard for images saved with transparent backgrounds
- Updates to the **Core Business Vocabulary Standard** for the addition of attributes for fish Traceability
- Updates to the **Global Data Synchronisation (GDS) – Trade Item Implementation Guideline** for the usage of GS1 additional country codes and how they should be used for Target Market
- A small release to the **Global Data Synchronisation Standard, Maintenance release 3.1.7**; Attributes, Codelist and Validation Rules
- Updates to the **EPC™ Radio-Frequency Identity Protocols Generation-2 UHF RFID Standard** to harmonize the standard with ISO 18000-63 clarifications
- Updates to the **Global Product Classification Standard Publication** June 2018 new content to expand classification in Lawn/Garden Equipment, Crops, Home Goods, and Tableware

Mission Specific Groups Status Overview

Mission Specific Work Group Name	IESC project approval/group formation	Requirements	Standard in development	Completed	Target delivery date
Digital Link (Uniform Resource Identifier (URI) Structure)	Phase 2 in planning				Aug-18
Messaging for Verification of Pharmaceutical Saleable Returns					Dec-18
Clinical Trials					Feb -19
Fighting Illicit Trade (FIT) (phase II of High-Speed Barcode Printing)	Multiple deliverables (Data Sharing)				Mar-May 2019
EPCIS and CBV 2.0	Multiple deliverables (Sensor)				Timeline in planning
