1 Introduction

The Global Standards Management Process (GSMP) is a community-based process for creating deliverables that serve the GS1® community.

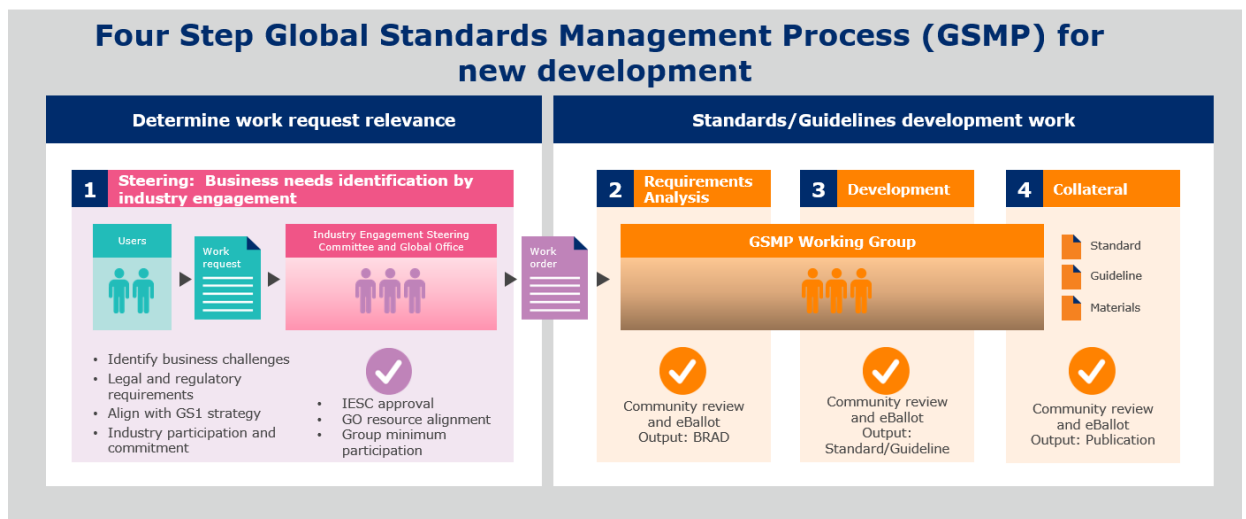

The deliverables from GSMP are:

- **GS1 standards:** documents that trading partners agree to follow in order to achieve interoperability goals. The rules that must be followed are called *normative* statements.
- **GS1 guidelines:** non-normative documents that assist individual organisations in understanding and applying GS1 standards.
- **Collateral materials:** other documents that provide an understanding of GS1 standards and GS1 guidelines and how to use them.

GSMP is measured by activity, performance, participation and quality. This report contains measurements for the first quarter of 2018.

2 Standards and guidelines are created through the GSMP 4-Step Process

Figure 2-1 GSMP process

3 Standards and guidelines delivered in 2018

3.1 Delivered in Q2

Updates to the **Consumer Product Variant into GDSN Implementation Guideline** to provide guidance data exchange for Consumer Product Variant information through the Global Data Synchronisation Network (GDSN)

Updates to the **Global Data Synchronisation Network Maintenance release 3.1.6** to encompass new attributes and technical validation rules

Updates to the **Human Readable Interpretation (HRI) Implementation Guideline** to fully align with the GS1 General Specifications

Updates to the **Leveraging GDSN for the FDA Global Unique Device Identifier Database (GUDID) Implementation Guideline** to decouple the attribute-mapping document from the guideline

Updates to the **Logistics Interoperability Model Application Standard** to align the GS1 Logistics Interoperability Model (LIM) with the latest GS1 XML and EANCOM Standard releases

3.2 Delivered in Q1

GDSN Maintenance Release 3.1.5 was published and went into production May 2018. It is a small GDSN release with the addition of optional attributes and Efficient Code List (ECL)

- Updates to the **GDSN Trade Item Implementation Guideline** for
- Clarification implementation of components Efficient Code List (ECL)
 - Additions to the Unit of Measure (UoM) code

Updates to the **Core Business Vocabulary Standard** for Tax ID

Updates to the **Global Fish, Seafood and Aquaculture Implementation Guideline** to aid in the adoption of consistent business practices to effectively manage traceability for the seafood industry

3.3 Projects status

Figure 3-1 Project status graphic

Mission Specific Work Group Name	IESC project approval/group formation	Requirements	Standard in development	Completed	Target delivery date
Clinical Trials Processes					Jan-18
Consumer Product Variant (CPV) for the Global Data Synchronisation Network (GDSN)					Completed
EPCIS and CBV 2.0					Timeline in planning
Fighting Illicit Trade (FIT) (phase II of High-Speed Barcode Printing)					Timeline in planning
Messaging for Verification of Pharmaceutical Saleable Returns					Jan-19
Mobile Ready Hero Images					Aug-18
Uniform Resource Identifier (URI) Structure					Jun-18

Legend:

- on-target
 at risk
 will not meet target
 complete

3.4 Work request activity

Work requests (WR) entered for new standards or modifications to existing standards.

- 82 work requests were entered this quarter. In line with 88 entered in Q1
- 78 work requests closed this quarter, in line with 77 closed in Q1

Figure 3-2 Work requests submitted to Standards Maintenance Groups in this quarter

Work request activity is classified and reported in several ways below:

Table 3-1 Work requests submitted for each standard

Standard	2015	2016	2017	2018 ytd
Automatic Identification Data Capture (AIDC) *	27	31	23	7

Total	58	14	15	0	87

3.6 Standards Development Work Group

Standards Development (SD) Groups are responsible for GS1 system development including, developing GS1 standards, GS1 guidelines, and other deliverables that support their deployment. There are two kinds of SD work groups:

- **Standards Maintenance Groups (SMG):** SMGs have an indefinite lifetime, are responsible for the on-going maintenance and enhancement of one or more existing GS1 standards or GS1 guidelines.
- **Mission-specific Work Groups (MSWG):** MSWGs are formed to do a specific piece of work as described in its charter, which disbands when the work is complete. Mission-specific Work Groups are created for most work efforts of substantial scope.

Standards Development Work Group overview:

- 6 Standards Maintenance Groups (SMGs) are active; Barcodes SMG is not active at this time
- 7 Mission-specific Work Groups (MSWGs) are active

3.6.1 Standards Maintenance Groups (SMGs)

Table 3-6 Standards Maintenance Groups operating

Group name	Call to action date	Group status
Barcodes	15 Apr 2010	Inactive
Data Accuracy (DA)	15 Apr 2010	Working
Electronic Data Interchange (EDI)	15 Apr 2010	Working
Global Master Data (GMD)	15 Apr 2010	Working
Global Product Classification (GPC)	15 Apr 2010	Working
Identification (ID)	15 Apr 2010	Working
Traceability and Event Sharing (T&E)	26 May 2011	Working

3.6.2 Mission-specific Work Groups (MSWG)

Table 3-7 Mission-specific Work Groups operating

Group name	Call to action date	Group status
Clinical Trials Processes	21 March 2018	Working
Consumer Product Variant in the Global Data Synchronisation Network	28 August 2017	Working
EPCIS and CBV v2	19 February 2018	Working
Fighting Illicit Trade, formerly High-speed Barcode Printing (HSBP)	21 March 2018	Working
Messaging for Verification of Pharmaceutical Saleable Returns	21 May 2018	Working
Mobile Ready Hero Images	5 September 2017	Working
Uniform Resource Identifier (URI) Structure	11 December 2017	Working

3.6.3 No Mission-specific Work Groups were closed this quarter

3.7 Performance

Work requests are the entry point into the GSMP process to request new standards or modify existing standards per the process and procedures laid out in the GSMP Manual. The time it takes for a work request to be processed in GSMP is measured below.

3.7.1 Standards maintenance work

A work request is categorised as maintenance if it is a single, or a group of small changes to an existing standard or guideline, that can be developed in a Standards Maintenance Group. Examples: errata, new EDI code values, new symbol placement rules, GDSN Validation Rules.

There are two types of maintenance Work requests:

- **Maintenance Type 1:** Simple changes to a standard, considered on-time if it is completed within 180 days (10 day variance permitted)
- **Maintenance Type 2:** Development time is expected to be longer than 180 days. These are considered on-time, if completed within 365 days (10 day variance)

3.7.1.1 Standards Maintenance Groups' Performance

- 100% of all work requests completed this quarter were completed on time (within the service level agreement stated above).
- The median development time for a 2017 maintenance work request was 66 days. There is not enough 2018 data to report at this time.

Table 3-8 Standards Maintenance Groups work request activity summary for the quarter

Standards Maintenance Group (SMG)	Total WR entered this Qtr	Total WR closed this Qtr	Closed on time	Additional time needed	% Closed on-time	Withdrawn/ Solution exists/bundled	Open WR 30 June 2018
Data Accuracy (DA)	0	0	0	0	100%	0	0
Electronic Data Interchange	6	2	1	0	100%	1	12
Global Master Data (GMD)	42	39	34	0	100%	5	32
Global Product Classification (GPC)	21	29	29	0	100%	0	21
Identification (ID)	7	3	1	0	100%	2	9
Traceability & Event Sharing	1	0	0	0	100%	0	1
Total (SMG)	77	73	65	0	100%	8	75

Note: Maintenance on-time performance is measured from the submission date, to the GSMP complete date, and ready for ratification (if applicable).

Figure 3-4 EDI and GMD SMG updates

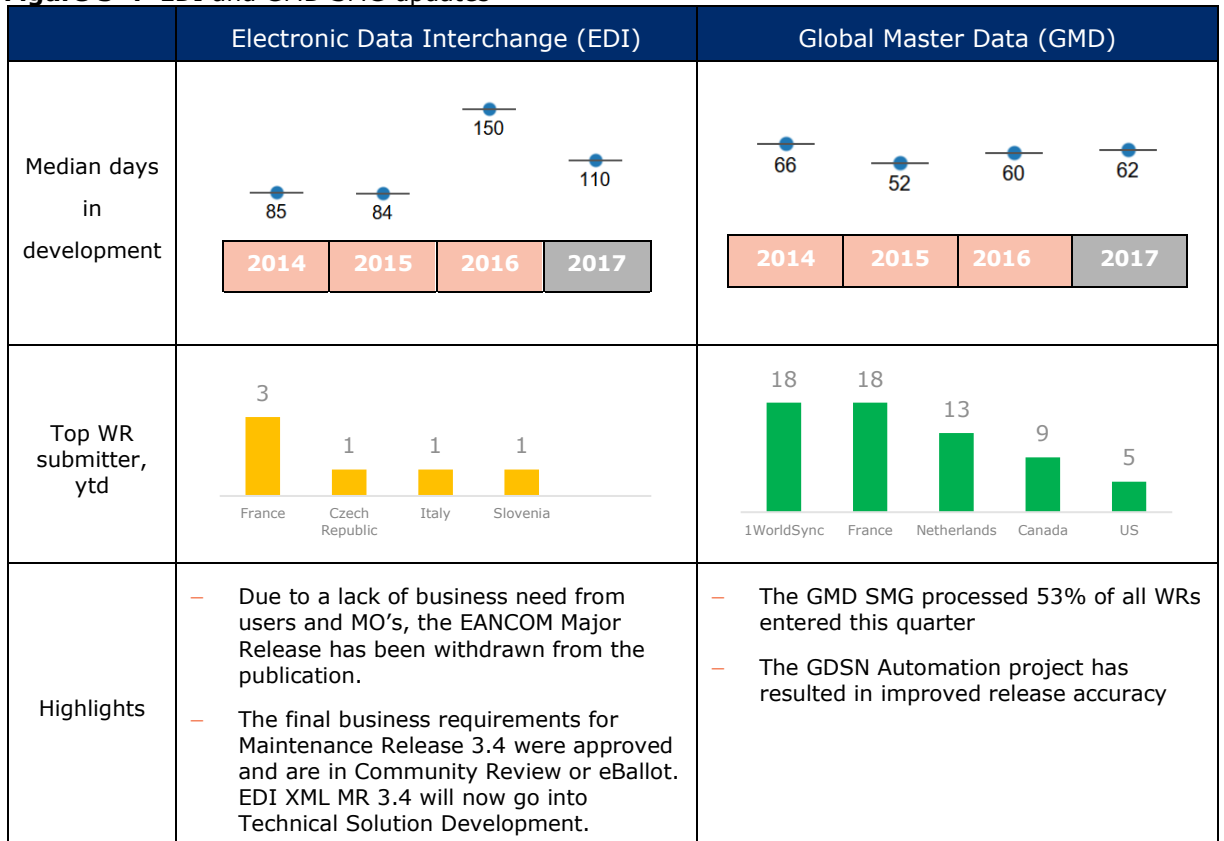

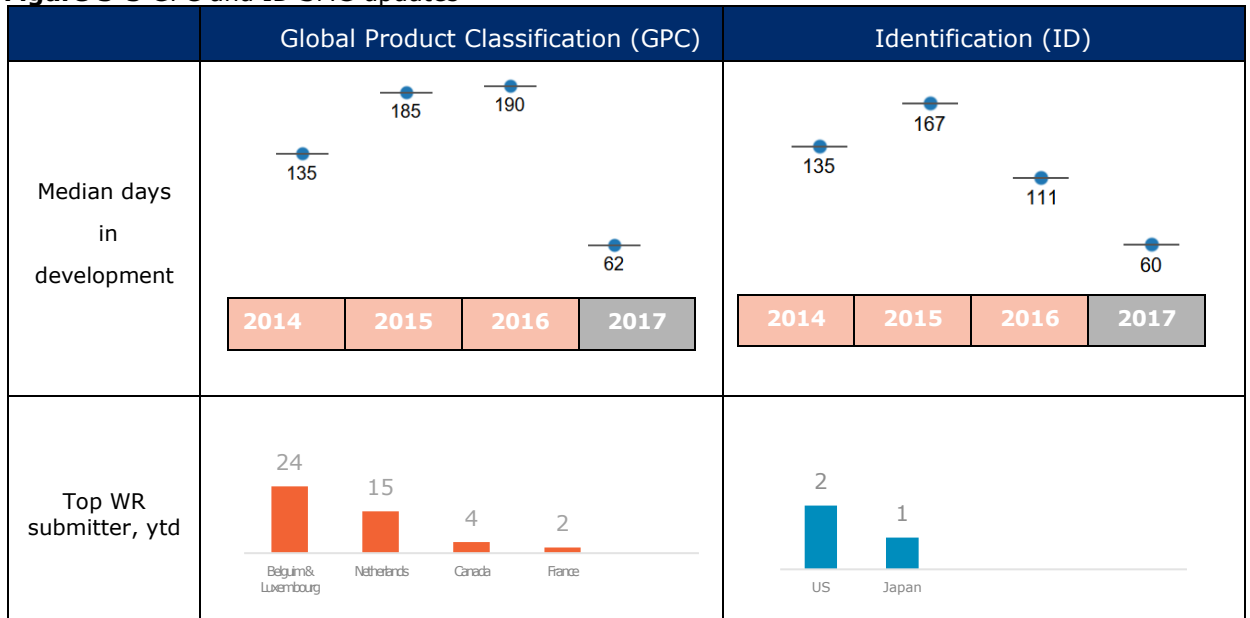

Figure 3-5 GPC and ID SMG updates

	Global Product Classification (GPC)	Identification (ID)
Highlights	<ul style="list-style-type: none"> - GPC June 2018 Release published successfully on June 25, 2018 - Process initiated to provide GPC Translation files online, scheduled to be available by end of 2018 - Sean Lightholder is officially a new Co-Chair (Werner Kolb retired) - Time to process work requests remains at an all time low 	<ul style="list-style-type: none"> - The group is processing work for V 2019 of the General Specification with input from multiple sectors such as Healthcare GLN Application Guideline, MRO Implementation, Maritime Equipment Directive. - Advancing Identification Matters (AIM) and GS1 are collaborating to process the Sensor Application Identifier - Need to fill open co-chair position - ID SMG participants are participating in ID related activities with URI Structure MSWG and Fighting Illicit Trade MSWG

Note: 1. Traceability & Event Sharing and Data Accuracy SMG's have minimal activity, and therefore, are not included

Legend:

 All WR for year are closed  WR are still open for year

3.7.2 Development work

A work request is categorised as development, if it involves creation of a new standard/guideline, or significant change to existing standard/guideline and the work is completed in a Mission Specific Work Group. Examples: extension to GDSN, a new EPCglobal High Frequency (HF) Air Interface Standard, enhancement to the EPCIS Standard to include aggregation layers, a new barcode symbology, a new Business Message Standard. Development work is on time, if the work is completed in, or under the estimated time to complete. The estimated completion date is defined in the project plan at the start of the development stage. There were no development work efforts completed this quarter

4 Participation

Participants in GSMP are organisations (companies or other recognised entities); each organisation is represented by one or more individual persons belonging to that organisation. There is no limit to the number of individuals from a single organisation that may participate. Companies not a member of GS1 are non-voting. There are three types of participating members:

1. GSMP community member (non-voting)
 - Company has signed GS1 Intellectual Property (IP) Policy
 - Individual has joined the GSMP group in GS1 Community Room
2. GSMP community member (voting)
 - Company is a member of GS1
 - Company has signed GS1 Intellectual Property (IP) Policy
 - Individual has joined the GSMP group in GS1 Community Room
3. GSMP Work Group Member
 - Company has signed the GS1 Intellectual Property (IP) Policy
 - Company has signed a group Opt-in Agreement
 - Member has joined the GSMP group in GS1 Community Room

4.1 GSMP company membership

Table 4-1 Number of member companies in GSMP by year

Group	2015	2016 *	2017	2018 ytd
Users	442	496	317	382
MO's	56	56	52	62
Total	498	552	369	444

* GSMP changed membership management systems in April of 2017. All companies who did not have an active associate since January 1, 2016, were archived due to inactivity

Table 4-2 **Member companies by interest category** Table 4-3 **Member companies by region**

Interest category	# of participants
Academia	6
Association	9
Auto-ID	3
Central Bank	5
Data Pool	7
Distributor / Group Purchasing	9
eTailer	3
Government Agency	8

North America	12
Middle East & Africa	150
Total	444

- GSMP has 444 active member companies in a GSMP Work Group, 382 companies are voting members and 62 companies are non-voting

4.2 Voting

Each company/organisation represents one vote in GSMP, regardless of the number of associates. GSMP requirements and standards reach approval by community eBallots. Each eBallot requires approximately 12 votes with additional supply chain role minimum votes (charter variations may apply).

- The average number of votes per ballot this quarter was 20, up from 18 last quarter. 39 ballots were passed this quarter.
- Event attendance

4.3 Event attendance

GS1 Global Office hosts two events every year for the GS1 community to collaborate face-to-face on industry needs and the development of GS1 standards. The next event will be:

- GS1 Industry and Standards Event will be held in Dublin, Ireland 10-14 September 2018

The latest GS1 Standards Event took place 19-23 March 2018 in Jersey City, USA. Attending the event were 206 individuals from 22 different countries.

Table 4-4 Event attendance by individual/organisation

By organisation	2015 Jersey City	2015 Warsaw	2016 Jersey City	2016 Brussels	2017 Jersey City	2017 Brussels	2018 Jersey City
Affiliate, Associates, Auto- ID Lab, other	5/5	19/15	5/5	36/26	12/7	21/14	21/12

Total	195/71	279/104	207/85	340/128	200/66	379/135	206/79

5 Quality

The GSMP defines quality as the entire process employed to ensure that all GS1 standards are user-driven, globally applicable, royalty-free (to the best of our ability) and that ultimately meets the needs and requirements defined by its members.

5.1 Due process

All GSMP groups are expected to follow the processes and procedures specified in the GSMP Manual. A community eBallot is used to confirm community consensus to progress a draft standard, or other GSMP deliverable.

5.2 Consensus

Decision-making is achieved through consensus, which is defined as approval without sustained opposition. Voting options are yes, no and abstain. Total votes cast; ; 820 yes, 16 no, 30 abstain. Abstain is used when a voter is not familiar enough with the material to cast a vote, but has read through the material.

Below are measures of due process and consensus in the GSMP:

- Zero (0) due process infractions
- 79% of all eBallots approved this quarter were unanimous, down from 94% last quarter
- 98% of votes cast this quarter were affirmative (not including abstain)

5.3 Satisfaction survey results

GS1 issues several surveys to measure satisfaction with GSMP. Survey results are structured in three categories:

- unfavourable = sum of very dissatisfied and fairly dissatisfied
- neutral

- favourable = sum of satisfied and very satisfied

Favourable and unfavourable answers are shown in percent using this structure: fav/unfav. Neutral answers are not used in reporting the survey results; they are viewed as opportunities to move a response to favourable. The results of the three surveys are detailed in the next three sections.

5.3.1 GSMP member satisfaction survey

Overall satisfaction with GSMP rose 12 percentage points to an all time high of 81%, followed by a rise of 16 percentage points for staff to another all-time high of 90% favourable with 0 unfavourable ratings for the first time ever!. The Process followed suit and rose the largest percentage points – 25% to another all-time high of 67% satisfied.

Figure 5-1 GSMP member satisfaction survey results

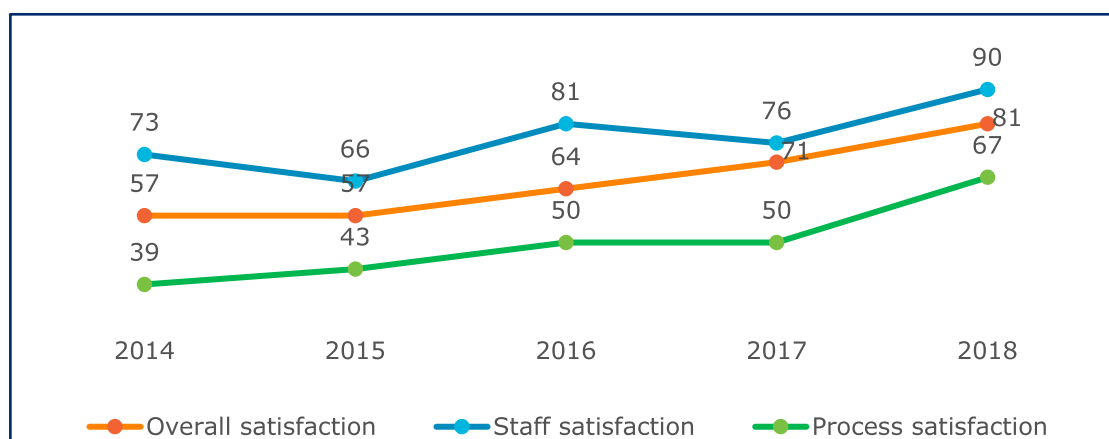

Table 5-1 GSMP member satisfaction survey results; satisfaction overall, with the staff, and with the process

	2014	2015	2016	2017	2018
Questions	% FAVS/UNFAVS				
Overall satisfaction with GSMP	57/7	57/13	64/8	71/3	81/3
Satisfaction with GSMP staff	73/4	66/9	81/2	76/3	90/0
Efficiency of process	39/14	43/17	50/8	50/5	67/5

5.3.2 GS1 Standards events satisfaction survey results

Table 5-2 GS1 Event satisfaction survey results

Programme activity	2015 Jersey City	2015 Warsaw	2016 Jersey City	2016 Brussels	2017 Jersey City	2017 Brussels	2018 Jersey City
Overall, how satisfied were you with the GS1 Standards Event?	93/2	93/1	98/2	97/0	92/2	98/0	96/2
How satisfied were you with the event facilities?	94/2	91/4	99/0	79/6	91/0	88/4	93/1
How satisfied were you with the week's agenda?	75/7	89/11	96/4	98.2	88/13	98/2	95/5
How satisfied were you with the Tuesday Plenary?	76/9	68/16	93/7	80/7	92/0	83/0	89/3
Average	85%	85%	97%	89%	91%	92%	93%

5.3.3 GS1 Member Organisation satisfaction survey

Favourable responses from GS1 Member Organisations decreased to 74% favourable from 78% in 2017

Figure 5-2 GSMP MO satisfaction survey results

Table 5-3 GS1 MO satisfaction survey results table

Question	% FAVS/UNFAVS				
	2014	2015	2016	2017	2018
Overall satisfaction with GSMP	75/2	64/1	73/0	78/3	74/4

GSMP Governance Groups

5.4 Board Committee for Standards (BCS) members

Art Smith, GS1 Canada
 Barron Witherspoon, Procter & Gamble
