2019 Year-end Executive Summary

Global Standards Management Process (GSMP)

Happy New Year! 2019 was an excellent year for adding value for our members, thank you for all for your hard work!

This year has been especially satisfying to see how several GS1 project teams pushed past their original scope of work and asked to continue developing even more standards to help solve their business challenges. This reflects the value that GS1 and GSMP provide to the community. The community appreciates that GSMP provides a safe and collaborative space where competitors can work together to reach a global consensus and drive change. Work efforts such as Clinical Trials and Digital Link have moved to second or even third phases to meet the needs of GS1 members, who not only see the value of their current work – but want more!

Also, this was the third consecutive year for record-breaking achievements for the number of requested changes to, or creation of, new standards: almost 400 new Work Requests in 2019. This is yet another affirmation from the community for the value delivered by GS1’s global standards.

As you prepare for 2020, please note that our first Standards Event for this year will be co-located with GS1 Connect in Las Vegas, Nevada on 15-16 June 2020. Join us and take advantage of the opportunity to help shape the future of standards, together!

With your help, 2020 will be another record-breaking year for our community as well as for GSMP. Please let us know if there is anything that GSMP can do for you or your Members.

Regards,
Andrew Hearn
Vice President, Global Standards Development
