Reuse

| <p>Project Description</p> <p>Global Location Number (GLN) is used within the GS1 system to answer "who?" and "where?" throughout business. Existing standards are not able to fully address current and future use case needs. For GLN to work for those who need it, existing standards need to be enhanced and new standards will need to be developed. This will enable trading partners to create, manage, share and use the GLN to meet their party and location needs in a scalable, standardised manner.</p> <p>Deliverable/Objective</p> <p>GLN Non-reuse, Modernise GLN Allocation Rule and develop a data model for GLN</p> | <p>Company participation</p> <table border="1"> <thead> <tr> <th></th> <th>Roster</th> <th>Required</th> <th>Votes</th> </tr> </thead> <tbody> <tr> <td>Manufacturer</td> <td>21</td> <td>4</td> <td></td> </tr> <tr> <td>Retailer</td> <td>3</td> <td>2</td> <td></td> </tr> <tr> <td>MO's</td> <td>31</td> <td>5</td> <td></td> </tr> <tr> <td>Hospital/SP/Other</td> <td>29</td> <td>2</td> <td></td> </tr> </tbody> </table> | | Roster | Required | Votes | Manufacturer | 21 | 4 | | Retailer | 3 | 2 | | MO's | 31 | 5 | | Hospital/SP/Other | 29 | 2 | | <p>Stakeholders</p> <table border="1"> <tr> <td>Sponsor</td> <td>Robert Beideman</td> </tr> <tr> <td>SDL</td> <td>Greg Rowe</td> </tr> <tr> <td>CE/Sol Liaison</td> <td>Timothy Marsh</td> </tr> <tr> <td>SME</td> <td>Dan Clark</td> </tr> <tr> <td>AG Liaison</td> <td>Sue Schmid</td> </tr> <tr> <td>Chairs</td> <td>Jeff Denton, Kevin Dean, John Terwilliger and Amber Walls,</td> </tr> </table> | Sponsor | Robert Beideman | SDL | Greg Rowe | CE/Sol Liaison | Timothy Marsh | SME | Dan Clark | AG Liaison | Sue Schmid | Chairs | Jeff Denton, Kevin Dean, John Terwilliger and Amber Walls, |

GSMP GLN Modernisation

Mission Specific Working Group (MSWG) WR – 20-180

What business challenges are being solved

This work group will update the GLN Standards to be more clear and concise and provide guidance to enable industry partners to create, manage, share, and use the GLN to meet their party and location use cases needs in a scalable, standardised manner.
