Project Description
Phase 3 – Clinical Trials members need to have the business message standards included in the implementation guideline, as without them, the industry can’t implement EDI. The approved guideline was only the first part and didn’t provide the industry stakeholders the technical information to complete implementation projects. In addition the group will review the healthcare GLN guideline and update to cater for clinical trials.

Deliverable/Objective
Add Business Message Standards to the Clinical Trial EDI Implementation Guideline utilising GS1 XML standards

Completed last 30 days
• Team finalised updates to the HC GLN guideline to include Clinical Trial info and motioned the guideline to go to the ID SMG to start the Community Review
• Team will conduct a final review of the BMS standard on the 10 Sept call and come back with any final comments for the 24 Sept call

Next steps
• GLN guideline will go into an extended community review
• BMS document to be motioned to the EDI SMG to start community by the end of Sept

Risks and Issues
• None at this time
