Project Description
This group will define and develop a revised version of the Low Level Reader Protocol (LLRP) Standard to clarify its use within the RFID community, identify and add new features needed to align with the Gen2V2 Air Interface standard while ensuring new features do not cause any disruption—and that the revised version of LLRP is backward-compatible with existing deployments. Any additional functionality not currently included in the Gen2V2 standard is considered out of scope of this project.

Deliverable/Objective
- Develop a revised version of the LLRP Standard to include the updated Gen2V2 standard.
- The group may identify guidance and training material to support the RFID community when implementing LLRP-based solutions.

Project Milestones
1. Project approved: August '19
2. Requirements: February '20
3. Draft standard: September '20
4. Publication: September '20

Completed last 30 days
- Drafted and reviewed LLRP solution document
- Agreed definition of attempts
- Agreed on SAME approach

Next steps
- Continue to update LLRP solution document
- Discussion if group wishes to conduct prototype testing and planning
