GSMP Scan4Transport (S4T)  
Mission Specific Working Group (MSWG) WR - 18-207

Project Description
Standards describing the contents and structuring of the GS1 2D barcode symbol (and other GS1 data carriers) on the transport component of the GS1 Logistic Label, particularly data elements that enable the transport process in the absence of access to host applications providing information related to the transport unit.

Key Transportation Process
- First/Last Mile process (e.g. delivery route optimisation)
- Sortation/Auto-sortation process (e.g. efficient sorting of parcels in the depot)
- Administration process (e.g. capturing proof-of-delivery, billing)

Deliverable/Objective
Develop a GS1 standard to enable industry to encode the minimum required transport data in a 2D barcode on a logistics label.

Completed last 30 days
- Core team conducted several calls to prepare phased deliverables
- Community Review S4T Application Identifiers [General Specification Change Notification (GSCN)]

Next steps
- Resolve Community Review S4T GSCN
- eBallot S4T GSCN
- Continue to finalise S4T Application Standard
- When S4T AS is ready, conduct public review

Risks and Issues
Timeline will need to be updated and move original delivery time frames.

Milestone deliverables
- Project approved December ‘18
- Requirements March ‘19
- Standard S4T GSCN June ‘20
- Publication July ‘20
