Healthcare

GLN Healthcare Registry for Healthcare™

One Registry for all

Healthcare locations in the
United States

Standard Data Formats for all

Catalyst for EDI

First step to greater standardization

Managed by Industry Steering Group

What is the Global Location Number (GLN)?

Global standard

Identification number of the GS1 system,

therefore unique and unambiguous

13-digit number that identifies:

- physical locations
- functional entities
- legal entities

Healthcare

GLN Registry for Healthcare™

GLNs

- Assigned to hospital
- Verified annually or sooner
- **Can not** be used to create an other GS1 data identification numbers (GTIN, GRAI,SSCC)
- Healthcare facilities can become member and enjoy use of entire system at any time

Healthcare

GLN Registry for Healthcare™

Healthcare facilities.

- Assigner and Editor roles.
 - Can't be same individual.
 - Fraud check.
- Annual review of information.
- System reminder.
- Personal reminder.
- GPO reminder.

Healthcare

GLN Registry for Healthcare™

Manufacturers and Distributors:
Annual subscription

- Based on revenue
- Plus one GLN for non UCC members

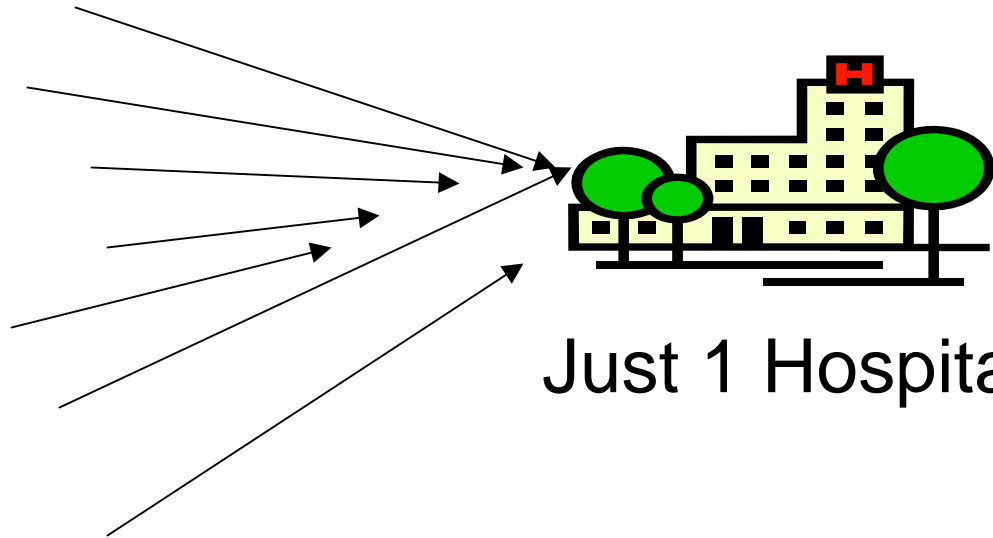

One site for all USA customers

- Accurate accounting
- Accurate shipping
- Customer requirement
- No more multiple sites to exam.

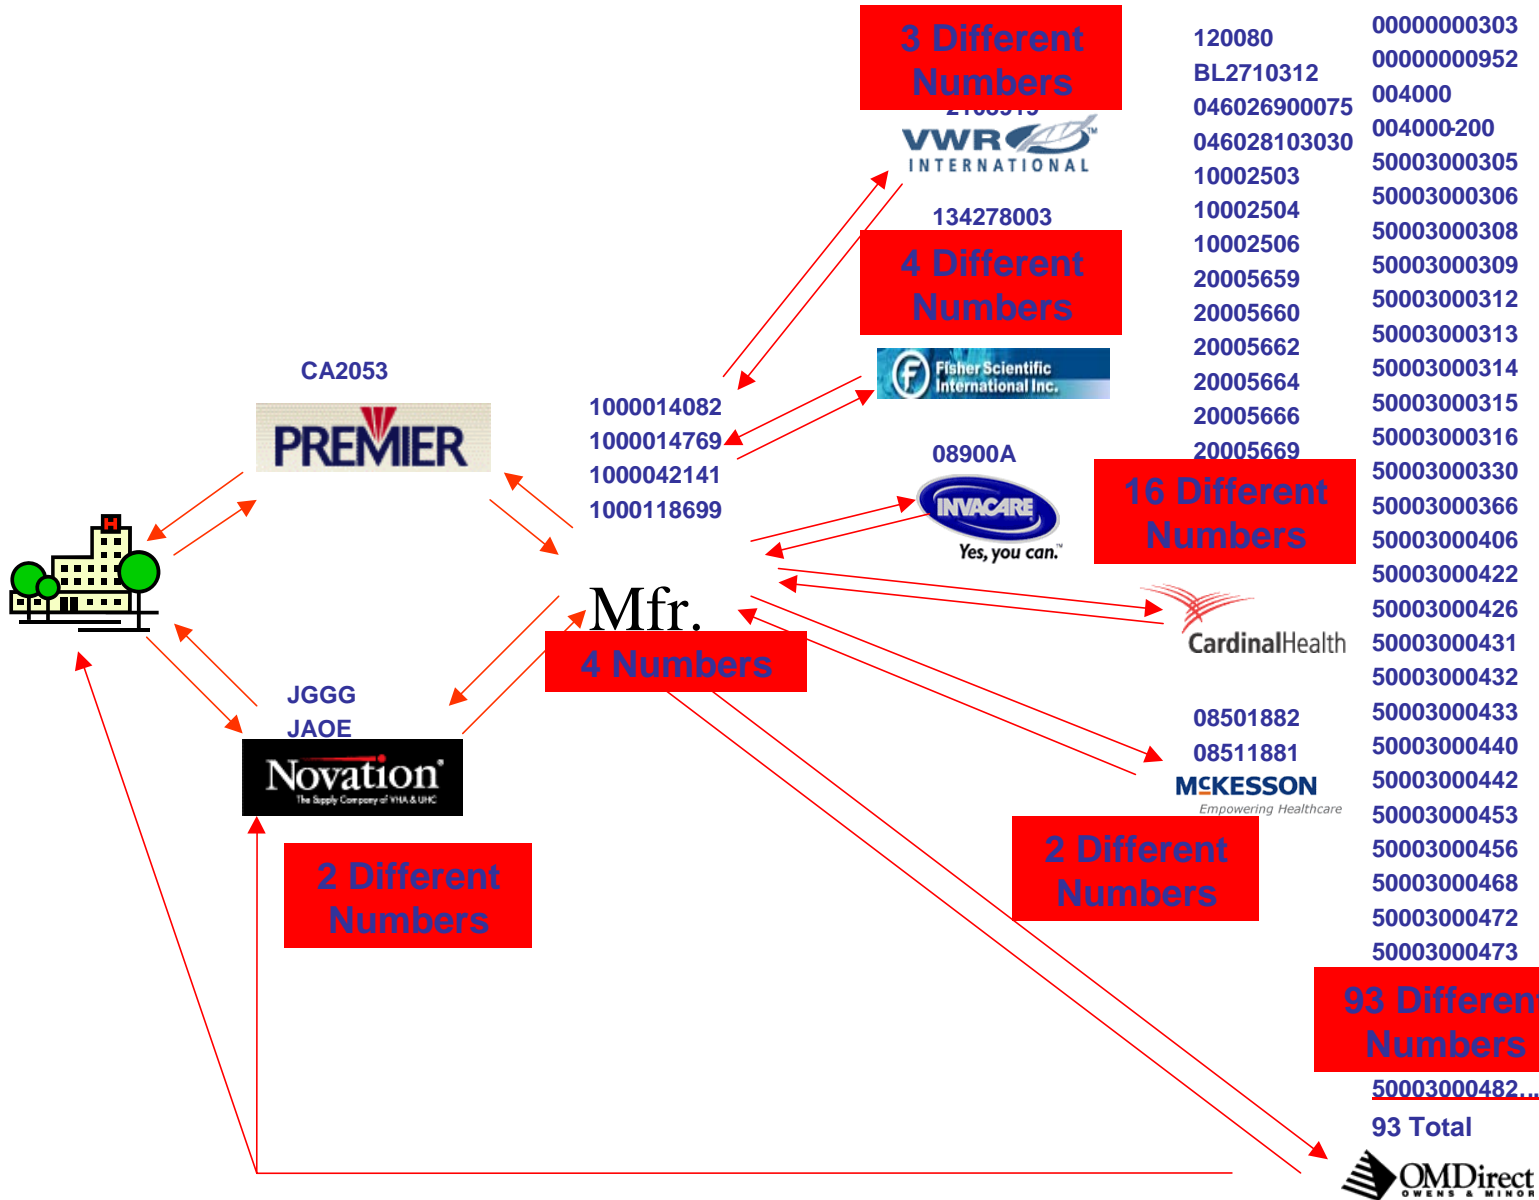

The Issue

Multiple identifiers for same location

St. Michaels
St Michaels
St. Michael's
Saint Michaels
100084547
JAOE
CA2053
50003000431
Etc.

Identifying customers example

GLN Registry for Healthcare™

Steering Committee

- Comprised of paid subscribers
- Supply chain members
 - Manufacturers / Distributors
 - Providers / GPOs
 - GS1 US and 1Sync

Manage Evolution of Registry

- Changes, additions

GLN Registry for Healthcare™

The GLN Registry for Healthcare™ is a directory of healthcare and healthcare related facilities in the United States, with corresponding Global Location Numbers (GLNs). The GLN is a globally recognized identification number used in the EAN.UCC System to identify legal entities, trading partners, and customer locations in electronic commerce activities. The GLN provides a globally unique identification of a functional entity.

Subscribers to the GLN Registry for Healthcare, which include hospitals, healthcare manufacturers, and distributors, access an updated and accurate list of industry manufacturers, distributors, retailers, hospitals, clinics, and retail and mail-order pharmacies to ensure the accuracy of their supply chain activities. The enhanced data integrity allows healthcare providers and suppliers to improve collaborative commerce activities in key electronic commerce processes such as invoicing and logistics.

The GLN Registry for Healthcare, was established by the Uniform Code Council, Inc.® (UCC®), leaders in facilitating efficient international business at the urging of leading United States healthcare organizations to drive down supply chain costs through a standard precise identification of healthcare locations.
