Barcode scanning in the OR

Elisabeth TweeSteden Ziekenhuis
The Netherlands

Roland van der Loos (OR Manager)
Jeroen van Winden (OR Supply Chain coordinator)

St. Elisabeth Ziekenhuis

Why?

- Stock piles

- Excessive administration for OR nurses

- No digital registration of implants in patients

The project

Phase 1

From OR costs to OR stock and costs of use per specialty

Scanning of Self created, non-GS1, barcode labels and manual entry of lotnumbers within OR

Automated ordering process

Phase 2

Use of supplier barcodes (GS1 and HIBC) and automated entry of lotnumber

In the Operating Room Theatre, ultimate goal for complete hospital

Risks

Overflow of administrative tasks for OR nurses

Changing the mindset for logistics

Matching system stocklevels with fysical stocklevels

Benefits

Digital recall

Stock reduction

Cost reduction

Optimal logistic process

Benefits: Digital Recall

Totaal

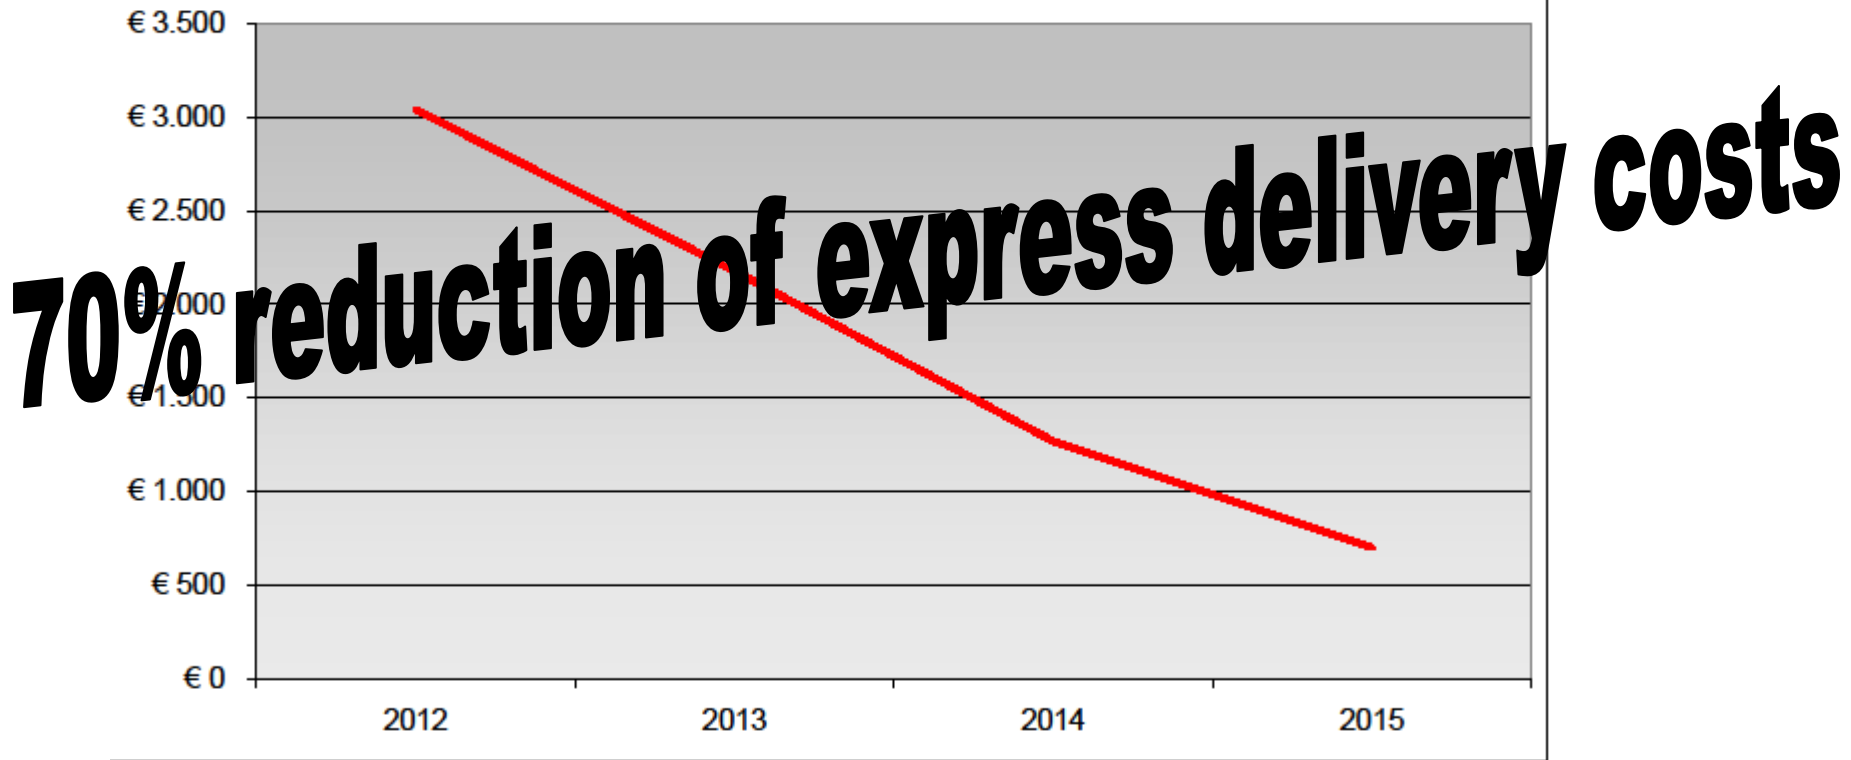

Query when recall vs paper files

Benefits: Stock reduction

Benefits: Cost reduction

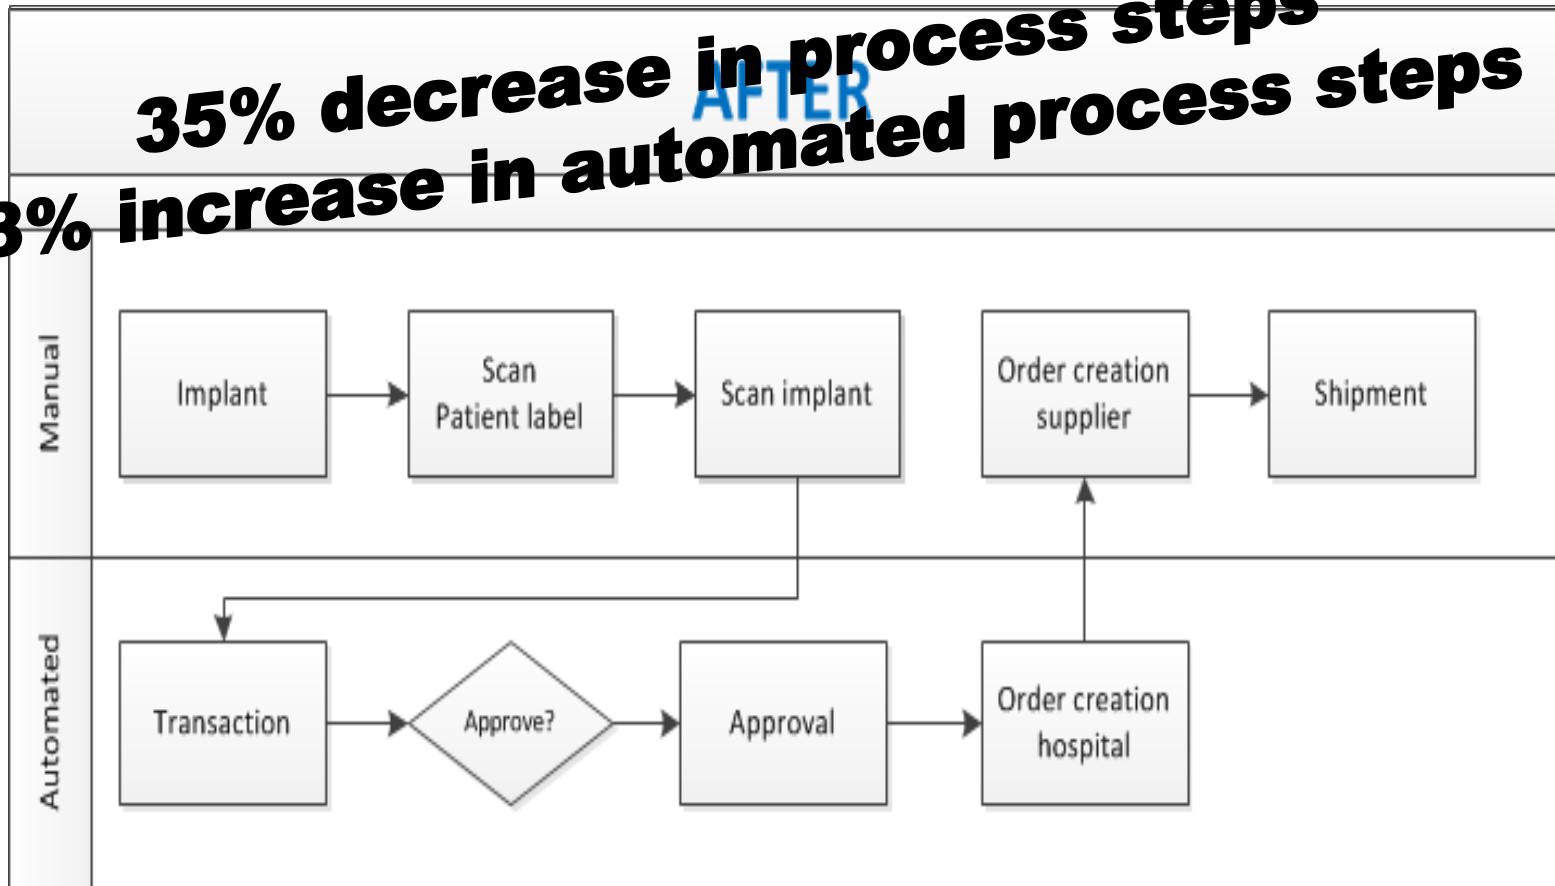

Express delivery costs

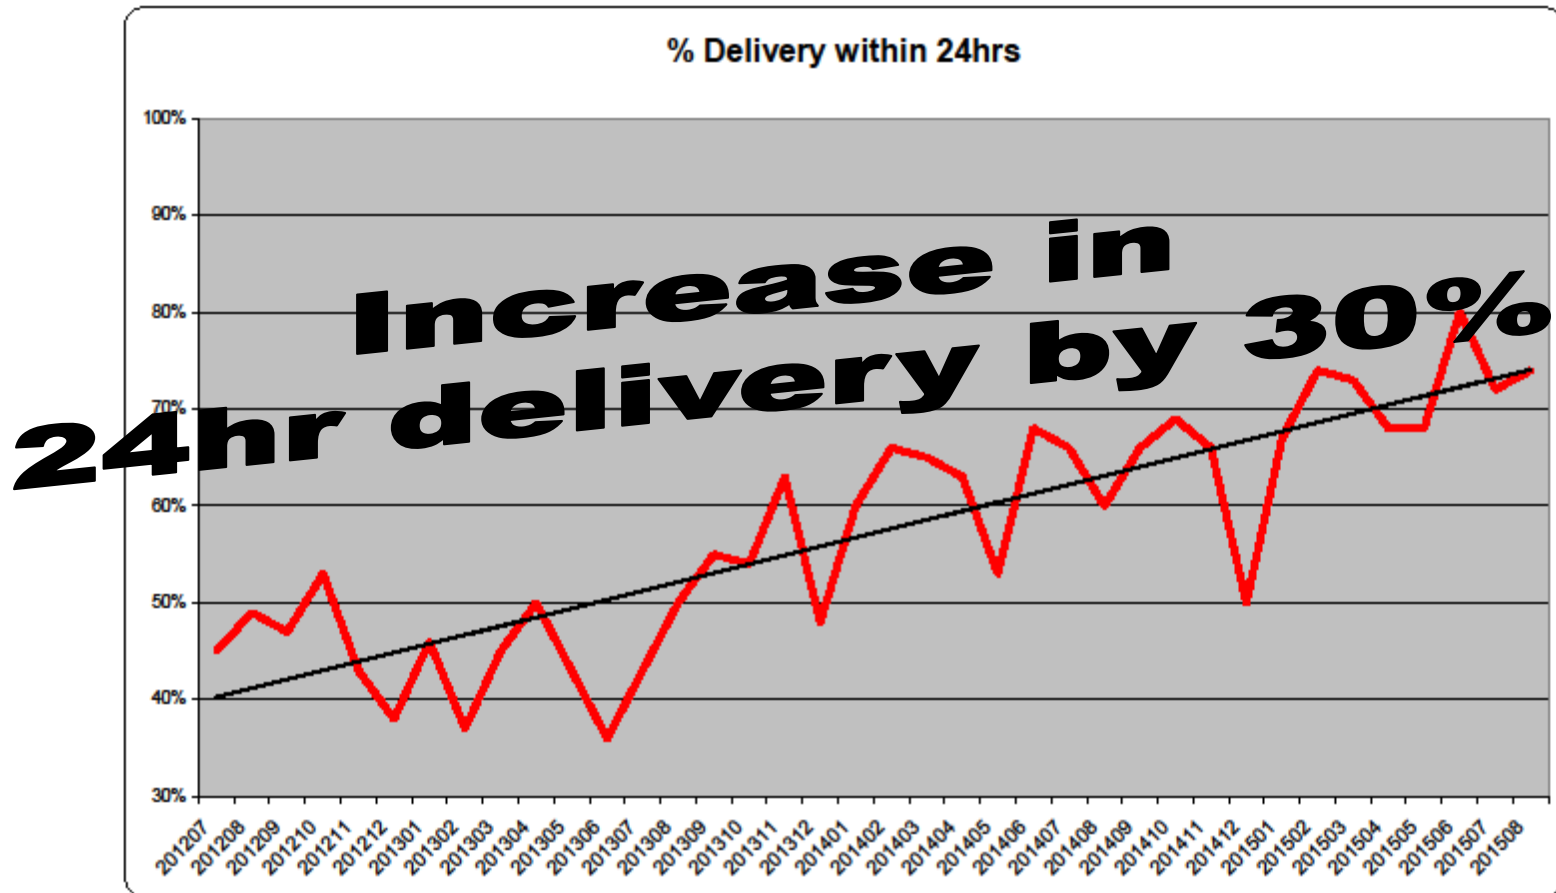

Benefits:

Lean from scan to order

35% decrease in process steps
48% increase in automated process steps

Benefits: Logistic process

GS1 compliance

We strive towards 100% GS1 barcodes in the OR:

- **Explaining the urgency to non-GS1 suppliers**
- **GS1 barcoded labels for non-barcoded items**
- **All new products need to have GS1 barcode**

Future

Roll out over OR 3rd location and onwards

Lotnumber track and trace from delivery to patient

Shifting the push-pull point from actual OR to planned OR

Don't hesitate, just do it!
