The GS1 Standards to ensure traceability and patient safety

**UDI**
- **UNIQUE DEVICE IDENTIFICATION**
  - UDI is mandatory for all medical devices, relates unique identification of the product, barcode and registration in the UDI database.

**GSRN**
- **CARE PROVIDER IDENTIFICATION**
  - To enable registration of care provider in patient’s electronic health record, such as in operations.

**GLN**
- **LOCATION IDENTIFICATION**
  - To check if the delivery is brought to the right place.

**GSRN + SRIN**
- **PATIENT IDENTIFICATION**
  - GSRN is completed with an instance number (SRIN) to identify patient stay or care provided.

**SSCC**
- **IDENTIFICATION OF MEAL TRAYS**
  - Secures that patient receives the meal prepared for her/him.

**GIA1**
- **ASSET IDENTIFICATION**
  - Identification of furniture or devices for accurate financial monitoring.

**SCC**
- **UNIQUE IDENTIFICATION OF DELIVERY**
  - For reception management and traceability of products in the hospital.

**GTIN**
- **IDENTIFICATION OF MEDICINAL PRODUCTS**
  - GTIN to manage inventory, prepare deliveries, tracing products internally and externally - and to be referenced in electronic health records.
  - Batch number and expiry date complete the GTIN for traceability and serial number to fight against falsification.

**SGTIN**
- **UNIQUE IDENTIFICATION OF CLOTHES**
  - To manage laundry distribution with robots.
