Barcode scanning in the OR

Elisabeth TweeSteden Ziekenhuis The Netherlands

Roland van der Loos (OR Manager) Jeroen van Winden (OR Supply Chain coordinator)

In this webinar

- Introduction
- Business Case
- Project overview
- Project benefits
- GS1 compliance
- Future
- Questions

Introduction

Elisabeth-TweeSteden ziekenhuis, Tilburg area
 The Netherlands

- 3 Locations
- Approx. 900 beds
- 24 OR's
- Approx. 20.000 surgical procedures
- Stockvalue ± € 3.5 mil.

Introduction

Jeroen van Winden Supply Chain Coordinator

Roland van der Loos OR Manager

Bottlenecks

- User has no responsibility for costs
- Costs made not visible per surgeon / specialty
- Stock piles
- No overview of expiry dates

- No digital registration of implants in patients
- Inefficient logistic process
- Lack of sufficient insight in stock value

Business Case Costs

• €40.000 invested from OR budget (phase 1)

Creating support executive board by proof of concept

• €30.000 invested from hospital (phase 2)

Business Case Cost Benefit

Phase 1 (estimates)

– Stock reduction 10% ± €21.000

– Waste reduction ± €10.000

Higher cost awareness ±€6.000

– Improved logistics ±€4.000

– Total
±€41.000

Business Case Cost Benefit

Phase 2

- Lowering CSSD costs ±€7.500
- Further stock reduction ±€20.000
- Reduction of staff (0,5 FTE) ±€29.000

– Total
±€46.500

The project

Phase 1

From OR costs to OR stock and costs of use per specialty

Scanning of Self created, non-GS1, barcode labels and manual entry of lotnumbers within OR

Automated ordering process

Phase 2

Use of supplier barcodes (GS1 and HIBC) and automated entry of lotnumber

In the Operating Room Theathre, ultimate goal for complete hospital

Risks

Overflow of administrative tasks for OR nurses

Changing the mindset for logistics

Matching system stocklevels with fysical stocklevels

Benefits explained

Digital recall

Stock reduction

Costs reduction

Optimal logistic process

Benefits: Digital Recall

Totaal							

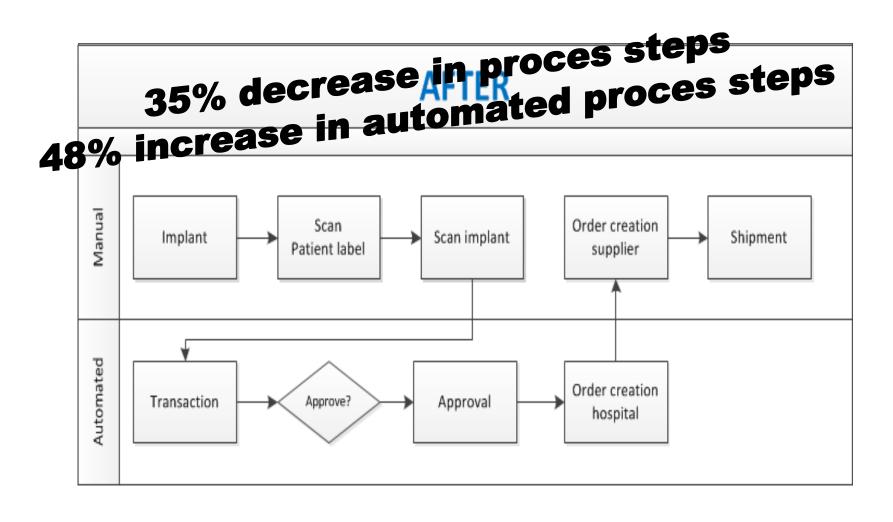

Benefits: Stock reduction

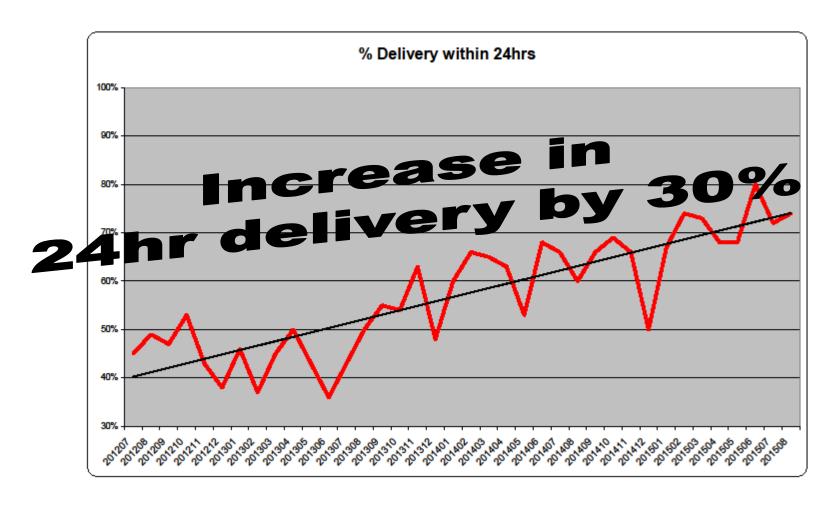

Benefits: Cost reduction

Benefits: Lean from scan to order

Benefits: Logistic process

GS1 compliance

We strive towards 100% GS1 barcodes in the OR:

- Explaining the urgency to non-GS1 suppliers
- GS1 barcoded labels for non-barcoded items
- All new products need to have GS1 barcode

Future

Roll out over OR 3rd location and onwards

Lotnumber track and trace from delivery to patient

Shifting the push-pull point from actual OR to planned OR

Don't hesitate, just do it!
