# 1. Business Domain View

## 1.1. Problem Statement / Business Need

This standard is part of a global GS1 solution for warehouse management that will support the optimization of warehouse management operations in a scalable way. This will ultimately take out unnecessary cost of the supply chain.

## 1.2. Objective

This standard defines the transaction model and data model for the following business message(s):

- Warehousing Inbound Instruction – Message that supports the warehouse inbound process, and enables a Logistic Services Client (LSC) to inform his Logistic Services Provider (LSP) that goods will be arriving.
- Warehousing Inbound Notification –Message that supports the warehouse intbound process, and enables a Logistic Services Provider (LSP) to inform his Logistic Services Client (LSC) on the status of goods received on behalf of the client.

## 1.3. Audience

This document is intended for anyone interested in implementing the GS1 eCom standards for Transport and Logistics.
