GS1 Healthcare Provider Advisory Council Webinar

Use cases of successful GS1 implementations in German, Austrian and Swiss healthcare

Martin Reitstaetter, MSc.,
Product Management and Development, Agfa HealthCare
November 2017
Welcome and thank you for attending!

- Welcome to our November 2017 webinar. Thank you to our guest speaker Mr. Martin Reitstaetter, MSc. Product Manager and Developer at Agfa HealthCare
- Some housekeeping for today:
  - All attendees will be on mute
  - If you have questions during the presentation, please type them into the questions area and these will be monitored then answered at the end of the call
- After the webinar:
  - Within a week, the recording will be posted to: http://www.gs1.org/healthcare/hpac_webinars
  - All previous webinars are also posted to this location, so please feel free to use this resource and share the link
The GS1 Healthcare Provider Advisory Council (HPAC)

Focus is on thought leaders and adopters of GS1 Healthcare Standards from the global clinical provider environment. Their final goal is to improve patient safety, cost efficiency and staff productivity through implementation of GS1 standards.

A forum for sharing and discussion

- About the practical realities of implementation of GS1 Standards in the care giving environment in regards to the impact on clinical care and patient interaction
- That support the adoption of GS1 Standards in healthcare providers and retail pharmacies
- For publication, presentation and sharing

Identification of projects and case studies

- To those involved in GS1 standards development, the wider Healthcare stakeholder community and senior executives/decision-makers to gain their buy-in and support for implementation of GS1 Standards

A source of expertise and advice
Webinars

- Monthly webinars open to all stakeholders interested in learning about GS1 standards implementation in the care giving environment.
- [http://www.gs1.org/healthcare/hpac_webinars](http://www.gs1.org/healthcare/hpac_webinars)

Awards

- Twice per year
- Provider Best Case Study Award
- Provider Recognition Award
- The prize is travel / accommodation to attend the next GS1 Healthcare conference
- [http://www.gs1.org/healthcare/hpac](http://www.gs1.org/healthcare/hpac)

GS1 Healthcare also holds two global conferences per year. The next conference will be in Bogota from April 10-12, 2018, with significant Healthcare Provider participation on the agenda.
Presenting today

Who am I

- Martin Reitstätter, MSc
- In the healthcare IT business for more than 20 years

- Since 8 years as product manager and developer also responsible for the AIDC integration in medical documentation systems.
- Prior to that knowledge engineer for expert systems and knowledge based decision support systems at the Technical and the Medical University of Vienna.
What happens when....

a GS1 barcode is scanned?

I am a location

I am an asset

I am a syringe

I am a doctor

I am an instrument

I am a patient

- Recall
- Inventory
- Payment

GS1 Standards enable many applications and uses within industry sectors

© GS1 2016
Example 1 – Cardiac Catheterisation

- Documents (GDTI)
- Articles (GTIN)
- Medication (GTIN)
- Trays (GTIN)
- Employee (GSRN)
Example 2 – ECG-Order

- Patient Identification (GSRN)
- Asset (GIAI)
Example 3 – Closed Loop Medication

Examination → Prescription → Administration → Preparation
Example 3 – Closed Loop Medication

- Dispenser (GSRN + SRIN)
- Medication (GTIN)
- Patient Identification (GSRN)
- Employee Identification (GSRN)
Preparation

Step 1: Printing

• Labels for all dispenser of the ward were printed (for the next day)

• Stick labels onto dispenser

medication dispenser with label, containing patient name, birthdate and barcode with GSRN and SRIN
Preparation

Step 2: Scanning

- Scanning of dispenser
- Prescription opens and shows the medication to prepare
- Medication package scanned and compared to prescription
Preparation

Step 3: Checking and Filling

- The system checks the scanned medication package against the prescription
- Dispenser will be filled

Checking the scanned medication against prescription
Filling of dispenser
Preparation

Step 4: Signing

- Scanning of an employee barcode closes the preparation process
- Double checking with a second employee barcode is optional

Scanning of employee barcode
Step 1: Dispenser scan

- Scanning of dispenser at patient’s bed
- Current prescription is shown
- Warnings are possible, if prescription changed in the meantime
- Prompt to scan the patient barcode on the wristband
Administration

Step 2: Patient check

• Scanning of patient wristband

• Checking, if right dispenser was given to right patient

Scanning of patient barcode
Administration

Step 3: Signing

• Scanning of employee id-card finalizes the administration process

• Crosschecking with a second employee barcode is optional

Scanning of employee barcode
Experience

- Closed Loop Medication
  - Patient Safety
  - Employee Safety
  - Batch Backtracking of Medications

- Cardiac Catheterisation
  - Fast Documentation of Articles
  - Batch Backtracking of Stents, etc.
Experience

• Main use case: material documentation
  - Master data quality
  - Education of acting nurses
  - Hardware

• Patient barcode mainly not yet standardized
  - Implementation of GSRN not clear
  - Patient-, case- or visit-related

• Standardized employee barcode mainly not yet in use
Thank You!

Yes, we scan!
