Disclaimer

GS1, under its IP Policy, seeks to avoid uncertainty regarding intellectual property claims by requiring the participants in the Work Group that developed this manual to agree to grant to GS1 members a royalty-free license or a RAND license to Necessary Claims, as that term is defined in the GS1 IP Policy. Furthermore, attention is drawn to the possibility that an implementation of one or more features of this Specification may be the subject of a patent or other intellectual property right that does not involve a Necessary Claim. Any such patent or other intellectual property right is not subject to the licensing obligations of GS1. Moreover, the agreement to grant licenses provided under the GS1 IP Policy does not include IP rights and any claims of third parties who were not participants in the Work Group.

Accordingly, GS1 recommends that any organization developing an implementation designed to be in conformance with this Specification should determine whether there are any patents that may encompass a specific implementation that the organization is developing in compliance with the Specification and whether a license under a patent or other intellectual property right is needed. Such a determination of a need for licensing should be made in view of the details of the specific system designed by the organization in consultation with their own patent counsel.

THIS DOCUMENT IS PROVIDED "AS IS" WITH NO WARRANTIES WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY, NONINFRINGMENT, FITNESS FOR PARTICULAR PURPOSE, OR ANY WARRANTY OTHER WISE ARISING OUT OF THIS SPECIFICATION. GS1 disclaims all liability for any damages arising from use or misuse of this Standard, whether special, indirect, consequential, or compensatory damages, and including liability for infringement of any intellectual property rights, relating to use of information in or reliance upon this document.

GS1 retains the right to make changes to this document at any time, without notice. GS1 makes no warranty for the use of this document and assumes no responsibility for any errors which may appear in the document, nor does it make a commitment to update the information contained herein.

1 Which information is requested for the Belgium & Luxembourg target market?

On the Belgian & Luxembourg target market there are 3 sector-depending datamodels present that define the relevant attributes that need to be entered by the data suppliers.

A view of the release notes and the datamodels can be found on the following pages:

- FMCG: <u>https://www.gs1belu.org/en/updates-releases-gs1-gdsn-fmcg-foodservice</u>
- DIY, Garden and Pet: <u>https://www.gs1belu.org/en/data-model-diy-garden-and-pet-sector</u>
- Healthcare: <u>https://www.gs1belu.org/en/update-echo-datamodel</u>

GOOD TO KNOW

If you are a company which is entering products for 2 or 3 sectors, you can optionally identify the sectors to which the item belongs to through the repeatable field 'target sector'. The sectors are identified by the codes: FMCG, DIY and HC. If you don't enter the 'target sector', My product Manager will automatically activate the data model rules based on your company settings and the indicated target market and Global Product Classification Code.

By selecting a specific 'target sector', you can avoid that unwanted validation rules are applied for your product.

2 Register for My Product Manager

In order to send product information to data recipients in Belgium or Luxembourg it's always necessary to also send the product information to the My Product Manager application. This is even the case if your trading partner has a direct GDSN connection and is able to receive product data directly from GDSN.

You will need to register for a My Product Manager Share account: <u>https://www.gs1belu.org/en/webform-registratie-my-product-manager-share</u>

3 Publish to My Product Manager

Once your account has been set-up you can start publishing your product data from GDSN

There are 2 ways to publish to My Product Manager from your GS1 GDSN datapool.

- 1. Publish to the target market Belgium (056) and/or Luxembourg (442)
- 2. Publish to the GLN of My Product Manager: 5410000876546

Upon receipt of the data My Product Manager will send CIC messages through **GDSN to inform the sender of the reception of the data**. These may contain the following:

- An item that has the status **incomplete in My Product Manager** because of errors in the data, will trigger a CIC **REVIEW** message.
- An item that has the **valid** status **in My Product Manager** will trigger a CIC **SYNCHRONIZED** message, but this does not mean that there is no warning in your record.

4 Login to My Product Manager

After you have published your data, you can login to My product Manager in order to:

- a) Verify which product were received by the application
- b) Verify the data quality of the data according to the local validation rules
- c) Manage the publication settings to define which recipients have access to your data.

GOOD TO KNOW

- My Product Manager is **read-only**, so you cannot **CHANGE ANYTHING** in My Product Manager, except for the publication settings of the trade items
- You will only see items for target market Belgium and/or Luxemburg in My Product Manager.

My Product Manager		

There are 2 ways to log in to My Product Manager (MPM) :

5 The 'My Product Manager'-application

5.1 Dashboard

In the 'Dashboard' you will find an overview of your company prefix(es), if known in our system.

Dashboard My Products My Publications My Reports My Actions

My Product Manager

Please consult the products that you have published from GDSN.

My company prefix(es)

5.2 My products

In the 'My Products' tab, you'll see a list of all items currently synchronized from your GS1 GDSN datapool with My Product Manager.

1) **Description**: Name of your product.

- 2) **GTIN**: GTIN of your product.
- 3) Packaging: Packaging level (base unit, outer box, display, ...).
- 4) Brand: Brand of your product.

5) **Status**: The status of your product sheet. This affects the visibility of your product sheet for <u>My</u> <u>Product Manager data recipients</u>. More information per status:

Incomplete	The product is NOT visible to the data recipients. One or more attributes have not been entered or are incomplete, so that it cannot be transmitted through to the data customer.
Valid	The product has been validated. The product is visible for the My Product Manager recipients.
Discontinued	The product contains an expiration date that has passed.

Through this tab you can check your product sheets: Products ${\bf Q}_{\rm c}$ Description, GTIN or brand C Reload Description GTIN Packaging Brand Status VALUE AND DESCRIPTION MATCHINGS IN COMPANY Base Unit renegative tillent Valid Property and a second second second DATA MADE NO. Base Unit NO.COLONE. Valid 1) Product search 2) Filter your products C Reload Q. Description, GTIN or brand Ŧ Consumer unit? Yes No Discontinued? Yes No Yes No Small barcode? Yes No Has images? 5.3 My publications

In this tab you can indicate whether your active products may or may not be published to **all** know<u>n</u> <u>MPM data recipients</u>.

More information on how to change the settings can be found in chapter <u>Opt-out procedure 'MPM</u> <u>targets'</u>

Publications

Default publication settings for new products						
Overview of publication settings per product						
			Q Descriptio	on, GTIN or brand		
Description	GTIN	Packaging	Brand	MPM targets		
 Relay three also 	101003043946	Base Unit	Processperie Hilleret	Public		
 Internation sets 	Internation Advantage	Base Unit	ADDCOBLEMB	Public		

5.4 My reports

In this tab, you can view your data quality report. For more information about your reports in My Product Manager, please consult the <u>Manual- My Product Manager - How to correct product sheets</u>

In summary, it comes down to the following points:

- This report shows you what data quality is for sheets you published to target market Belgium and Luxembourg.
- Adjustments need to be made through your GS1 GDSN data pool.
- Errors are returned to your GS1 GDSN data pool through a CIC message.

3.5 My actions

This tab has 2 functions:

- It gives you an overview of all bulkactions made in your profile.
- A shortcut to all actions possible
 - Request an export of your products, you will get an overview of all your products that are in My Product Manager.
 - You can update your publications through the bulk action <u>see chapter</u>

By clicking on 'Start a bulk action', you will get the several actions that can be done. Detailed information about how to do those actions can be found <u>chapter 4.2</u> (modify publication).

No bulk actions were found. Start your first action by clicking the button.

6 My Product Manager recipients

Before your product sheet is visible in My Product Manager you need to publish from your GS1 GDSN data pool to our target market or our GLN **5410000876546**

The sheets will then become available for My Product Managers recipients.

The publication settings for these recipiets can be found in the tab 'My Publications'.

Every product sheet with status **'Valid'** is automatically visible for a My Product Manager recipient. Do you wish that a certain sheet is not visible or that all your sheets are invisible for a certain My Product Mangaer recipient? Then go to the opt-out procedure

ATTENTION for food products (FMCG food)! Depending on the profile of your My Product Manager recipient, the visibility of your product sheet to them also depends on whether or not it is a consumer unit or food service item.

Do you enter a food product and is your My Product recipient e.g. Fooddesk, Colruyt, Delhaize, Bidfood or Lambrechts? Then they may not see your sheet because it is not a consumer unit/food service item.

6.1 Opt-out procedure "MPM targets"

By default, a product sheet that has the status 'Valid' will be visible to all <u>My Product Manager</u> <u>recipients</u>. You can adjust the default settings through 'Default publication settings for new products'.

If you still have a product that needs a specific publication setting in My Product Manager then you can manage this through 'Overview of publication settings per product'.

Default publication settings for new products

Overview of publication settings per product

ATTENTION! If you make such a change it is only for new releases and publications. To work retroactively you can use the bulk action (*cfr. Chapter 4.2*)

A. The default setting

It is important to set this to "**Yes**" if you want your product information to be available and visible to **all** recipients.

 Default publication settings for new products

 The settings below will be applied to all new products that are created and define which data recipients (that are connected to My Product Manager) have access to the product information. You can always override these settings per individual product in the "Overview of publication settings per product".

 The product information is public and may be sent to all known data recipients connected to My Product Manager.

 Yes

If you wish, it is also possible to specifically indicate that your product information is only sent to one or more recipients, instead of all registered recipients. You do this by indicating "**No**", and then further specifying which recipients may receive your product information.

When "No" is indicated, two columns appear. The recipients in the right column, are those who will eventually receive your product information.

The product information is public and may be sent to all known data recipients connected to My Product Manager.

Please indicate below which data recipients you want to give access to your product information.

Available Recipients	
MAKRO C&C BELGIUM N.V. (5400150000007)	
Fastlane Development (Recipient) (5430000482011)	
GS1 Belgium & Luxembourg (recipient) (5410000999993)	
Recipient_DIY (5410000200020)	
HTTML (5488888010154)	
Sligro Food Group Belgium (5420077200007)	

Selected Recipients

Tick the recipients who may receive your products, and add them to the right column ("Selected Recipients") by using the arrows....

You can also remove recipients from the list of selected recipients in the same way, by using the reverse arrow.

B. The product-specific setting

By clicking on the publication status in MPM targets, you can easily adjust the setting by making it public by selecting 'Yes' or select specific recipients by selecting 'No'.

Overview of publication settings per product						
			Q Descrip	tion, GTIN or brand		
Description	GTIN	Packaging	Brand	MPM targets		
 miles if months 	IN CONTRACTOR	Base Unit	Processor in Piller 4	Click to publish		
D RECEIVERS.	HE VEHICLES	Base Unit	RESIDENT AND	Public		

6.2 Publish in bulk

Do you have a lot of articles to publish? If so, you can also do this through a bulk action. As soon as you select 1 article you can click on 'Edit in bulk'.

			Q Destation	on, GTIN or brand 🛛 🕈
4 items selected				🖋 Edit in bulk Cancel
Description	GTIN	Packaging	Brand	MPM targets
🕢 lainiine nitin nitinii	OUTEROOUNDE	Base Unit	Promptio Hilent	Public
	0022102002040	Base Unit	ROBCOVEDNE	Public
	SECTOR STREET,	Base Unit	Promopelo tellerat	Public
	04013091238	Base Unit	Promogene Network	Public

You will then see your selection listed first. Have you forgotten items? Then you can look them up in the interface through 'Add products from search' (1) or by entering them yourself (2).

GTIN	+ Add products from sea	rch + Add GTIN
	Description	.
ALC: NO.	PROFESSION AND ADDRESS OF TAXABLE PARTY.	<u></u>
ALCONOMIC AND	100.000.000.000.000p(70)	8
November of	strategies mails (mp)	â

As final step, you then indicate whether you want to make it a target market publication (yes) or rather publish GLN specifically (no). If you then click confirm the bulk publication will proceed.

Manage publications

The product information is public and may be sent to all known data recipients connected to My Product Manager.
