The checklist below provides suggested elements to support the discovery and planning for a 2D pilot. Consider not only the technical elements you need to examine, but also the coordination needed for assembling and aligning your internal and external stakeholders.

**Technical checklist**
- Partner with your scanner and POS solution providers for guidance on system readiness for 2D.
- Evaluate backend system upgrades required to leverage additional data.
- Ensure systems can ingest additional data to support new business use cases.
- Ensure your scanners are ready to read all 2D in Retail standard barcodes.

**Stakeholder checklist**
- Collaborate with trading partners to align on business use case opportunities and additional data that you would like to capture.
- Evaluate opportunities for your private label products (see checklist for manufacturers).
- Collaborate closely with solution providers; make sure POS checkout is updated and configured for your business use cases.
- Identify common goals and measures with collaboration partners.
- Educate in-store associates.
- Educate consumers: self checkout, omni-channel and consumer engagement.

**Use cases for 2D barcodes**
From consumer engagement to traceability to inventory management, a variety of use cases can be unlocked by leveraging additional product data in 2D barcodes. For more information, visit the GS1 2D in Retail webpage at: www.gs1.org/2dbarcodes.

**Other resources**
The 2D Barcodes at Retail Point-of-Sale Getting Started Guide is a comprehensive resource to understanding the basics of 2D barcodes and the product data that can be included in them. If consumer engagement is a key goal for your pilot or implementation, see the Best practices for creating your QR Code powered by GS1.
