

Regulatory Working Group

Princeton, NJ – December 1, 2005
Jackie Rae Elkin

The global language of business

www.gs1.org

Future work to complement the baseline:

- Clearly define and segregate the variations of how EAN-13 is being used around the globe
- Work with targeted GS1 member organizations to provide more complete data – business cases
- Determine feasibility of a parallel path of information gathering from healthcare ministries working through the local GS1 member organizations

Outcomes of Working Group Sessions

Influence:

- Communication of key information and prevailing standards to healthcare ministries
 - Potential for communication to healthcare ministries by region

Moving Forward:

- Focus towards business case for implementation to achieve objective
- Team convergence with Standards Implementation to focus on methodology for implementation, business case, requirements specification
